Your ISA Portfolio - Key Features Illustration

Introduction

The Financial Conduct Authority (FCA) is a financial services regulator. It requires us, Aviva, to give you this important information to help you to decide whether our ISA Portfolio is right for you. You should read this document carefully so that you understand what you're buying, and then keep it safe for future reference.

The projected amounts shown within this Illustration are indicative and aren't guaranteed.

This illustration shows:

- The current value of your ISA Portfolio
- Payments and transfers in to your ISA Portfolio
- Investment selection for your ISA Portfolio
- Fees and charges which are applicable to your ISA Portfolio
- What your ISA Portfolio might be worth

Please read this document along with the 'Key features of the ISA Portfolio' and any other information you receive about your ISA Portfolio, so that you understand important information about benefits, inflation, risks, tax and your rights and commitments.

Staying informed

It's important to keep track of your ISA Portfolio. To help you do this we'll send you a statement every three months which will advise you of your ISA Portfolio value. You can also view the value of your investment at any time via MyAviva.

If you're unsure about anything in this illustration, please speak to your adviser.

Payments to your ISA Portfolio

Transfers

Source of transfer	Value*
Cash transfer from other providers	£20,000.00
Transfer(s) value	£20,000.00

*Exact amount will be known when transfer is complete

The maximum personal allowance contributions you can pay into this ISA Portfolio in the current tax year, excluding ISA transfer payments from previous tax years, is £20,000.00. Any additional permitted subscriptions will be in addition to this and won't affect your personal allowance. The single payment into your ISA Portfolio may include the initial advice charge, which will be paid to your adviser on your behalf. Your ISA allowance isn't affected by this charge. The tax treatment will depend on your individual circumstances and may change in the future.

Where will your payments be invested?

The total amount invested in each asset is shown below.

Investment	Transfers in
Assets	
CT Universal MAP Cautious C Acc	100.00%
Total investment	100.00%

The charges for your ISA Portfolio

The charges are described below. They comprise of:

- Our charges for administering your ISA Portfolio
The way these charges are paid is explained in your Key Features document
- Investment related charges
- Adviser charges

Product charges

The Aviva charge

We'll deduct a charge from your ISA Portfolio for the cost of administering your product. The amount will depend on how much is in your ISA Portfolio each month. When the charge is taken it's calculated based on the total value of your investments through this platform service, including the balance in the cash account.

For any investment above £0 - Above	0.21%
-------------------------------------	-------

Unless otherwise indicated, all charges are taken from the cash account. If there are insufficient monies in the cash account to pay charges, we'll automatically dis-invest the required number of units to pay charges. We won't do this if you have certain investments; please see the Key features for more information.

Investment charges

Based on your current choice, the charges are:

Investment	OCF/TER charge %
CT Universal MAP Cautious C Acc	0.29%
Weighted Average charge	0.29%

Fund manager Initial charge

This is a charge imposed by the fund manager on any purchase of units by an investor. It's calculated as a percentage of the gross amount invested, and deducted prior to investment. Some funds may have different prices for buying and selling units. In these cases the initial charge is included within the price at which the units are bought.

OCF/TER % charge

In addition to the fund manager initial charge, fund managers will also take charges that depend on the investments chosen. These charges may be shown as the ongoing charge figure (OCF), total expense ratio (TER), or for insured funds, simply the annual fund charge. These cover the charge made by the fund manager for managing the investment as well as expenses incurred by the fund. Please note these charges are variable and may change over time.

Adviser charges

You've agreed to pay adviser charges through your ISA Portfolio

Ongoing adviser charge	1.00% of the value of your ISA Portfolio each year. Based on your new payments and today's value of your ISA Portfolio, this is estimated as £16.67 taken each month. The amount you pay will vary over time as the value of your ISA Portfolio changes.
------------------------	--

Interest on your cash account

Cash within your ISA Portfolio will be held in one or more interest bearing client money trust account(s) with external account providers of our choice. This cash will be held in accordance with the Financial Conduct Authority (FCA) client money rules, as amended from time to time.

The interest rate payable is 3.30% annual equivalent rate (AER) and is variable. AER illustrates what the interest rate would be if interest was paid and compounded once each year. Interest will be credited to your cash account monthly on or around the 1st of each month. Interest rates can be positive, zero or negative.

To check the current interest rate on the cash account at any time, go to aviva.co.uk/bank-interest-rates/

What your ISA Portfolio might be worth

This section shows how your fund may grow assuming three different yearly growth rates (low, middle and high). Firms must use lower, intermediate and high rates that reflect the investment potential of the product and don't exceed rates set by the Financial Conduct Authority (FCA). The actual rates of return could be higher or lower than these. There is no fixed date when your ISA Portfolio must end. This illustration shows what you might get back in the next ten years.

	Lower 2%	Medium 5%	Higher 8%
After 1 year	£20,000	£20,600	£21,200
After 2 years	£20,100	£21,300	£22,600
After 3 years	£20,200	£22,100	£24,000
After 4 years	£20,300	£22,800	£25,600
After 5 years	£20,400	£23,600	£27,200
After 6 years	£20,500	£24,400	£29,000
After 7 years	£20,600	£25,300	£30,800
After 8 years	£20,700	£26,200	£32,800
After 9 years	£20,800	£27,100	£34,900
After 10 years	£20,900	£28,000	£37,100

Important notes and assumptions:

- The growth rates aren't guaranteed. They aren't minimum or maximum amounts. What you get back will depend on how the investments grow, and the level of charges. The value of investments can go down as well as up and you may not get back the amount invested.
- Both product and adviser charges have been assumed to remain the same as they are today.
- Charges may vary in the future.
- You keep the same investments.
- Price inflation is the general increase in the price of goods and services over time. This can affect the future buying power of your money and therefore price inflation will reduce what you could buy in the future. The projected values shown do not take into account the impact of price inflation.

How the charges reduce the value of your ISA Portfolio

Below we illustrate the effect of the charges on your ISA Portfolio, We show how your fund(s) may grow in three ways:

- Without charges
- After product and investment charges
- After all of the charges

The numbers below are calculated on the middle basis 5.0% each year after taking into account inflation at an assumed rate of 0.00%.

At end of year	The payments into your plan	Withdrawals	Before charges are taken	If only plan and investment charges are taken	After all charges are taken from this plan
1	£20,000.00	£0.00	£21,000	£20,800	£20,600
2	£20,000.00	£0.00	£22,000	£21,800	£21,300
3	£20,000.00	£0.00	£23,100	£22,800	£22,100
4	£20,000.00	£0.00	£24,300	£23,800	£22,800
5	£20,000.00	£0.00	£25,500	£24,900	£23,600
6	£20,000.00	£0.00	£26,800	£26,000	£24,400
7	£20,000.00	£0.00	£28,100	£27,200	£25,300
8	£20,000.00	£0.00	£29,500	£28,400	£26,200
9	£20,000.00	£0.00	£31,000	£29,700	£27,100
10	£20,000.00	£0.00	£32,500	£31,000	£28,000

The product and Investment charges could reduce the value of this ISA Portfolio from £32,500 to £31,000 - this is the same as reducing the investment growth after inflation from 5.0% to 4.5%. This is a reduction in the growth rate of 0.5%.

All charges could reduce the value of this ISA Portfolio from £32,500 to £28,000 - this is the same as reducing the investment growth after inflation from 5.0% to 3.4%. This is a reduction in the growth rate of 1.6%.

The figures show the effect of charges so you can compare with similar products.

The effect of charges can vary, depending on payment type and investments chosen. We've combined the separate figures in a proportionate way to show the overall effect of total deductions.
