| Type of Meeting                      | Face to Face                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Anybody else present at the Meeting? | No                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Please provide details               | <p>Meeting took place at clients home at 12.30pm. Paper copies of IID taken with me and ran through at the meeting. Left a copy with them but will also e-mail a copy.</p> <p>They had started the Advixe Process with an IFA from Sandringham back in November. Had an initial meeting, had to chase him twice due to hearing nothing and 5 months on they had not received any advice so decided to go no further with them</p> |

# Employment Notes

Angela and Kevin are currently S/E and set up a Partnership back in 1994 doing HGV Haulage. Kevin is finding it physically more difficult, things are quite at the moment and they had big decisions about the wagon to take as it was getting old and costing more and more to fix.

They therefore made the decision to retire on the 29th of May and are both ready to retire and enjoy life. They have invoices O/S for work already undertaken which will come in June/July so will need to have income in place for August to help cover their expenditure needs.

They are selling the Wagon and Trailer with the Wagon worth £5,000 and the Trailer £40,000. Accountant advsied them to sell this Tax Year rather than last Tax year. These funds will come into the business account which will be used to pay the Tax due and the remaining funds will then be moved across to their personal accounts. Tax due in July is £6,000 so they are unsure as to what additional amount will be needed.

They have been taking £3,000 to £3,500 from the business account each month

| Joint Total        | £504,000.00 |

## Liabilities

It is desirable that a greater priority be given to the repayment / reduction of the levels of your debt prior to making an investment or committing to a regular premium.

|                              |    |
|------------------------------|----|
| Do you have any liabilities? | No |
|------------------------------|----|

## Credit History

|                                                 |    |
|-------------------------------------------------|----|
| Have you ever been refused a mortgage / credit? | No |
| Do you have an adverse Credit History?          | No |

## Asset & Liability Notes

House is jointly owned and valued at approx £450,000 which may be a bit low but they have not valued it for a long time. They have been mortgage free since approx 2008. No plans to move in the short term as they want to renovate the house a bit and enjoy the garden.

Longer term the garden is huge and requires a lot of work to maintain it. They know there will come a point where they will not want or be able to manage it and that point they would look to move. We are to assume they will spend but for a similar value.

There is £10,000 currently in the business account and they are selling the Wagon and trailer for approx £45,000 with funds initially going into the business account. They will then pay the tax that is due for this Tax Year and any other costs related to the sale of the Wagon and Trailer. They will then move any remaining funds into their personal accounts and fund their Cash ISA allowance for this Tax Year.

They have joint current account with appox current balance of £4,000. Income comes in and this is the account used to cover their expenditure

Angela has the following

Skipton Cash ISA - Variable Rate 3.6% - £85,000  
Marcus Cash ISA - Variable Rate 4.1% - £49,000

Kevin has the following

Skipton Cash ISA - Variable Rate 3.6% - £88,000  
Marcus Cash ISA - Variable Rate 4.1% - £40,000

They also have a motorhome which they have not used for while as the Dog and Cats make it difficult for them to get away now that both girls are not at home. Value is circa £40,000

| Are these funds available without penalty?                                       | No                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Additional Notes                                                                 | £262,000 of this is in Cash ISA's. Both Angela and Kevin have no investment experience and at this stage they do not want to consider investing any of these Cash ISA's. They are getting okay rates of interest and there money is not exposed to any investment volatility. Once they have got advice on their pensions and are being looked after and start to see how the investment side of things works then they may consider investing some of these funds |

## Budget Notes

They draw about £3,500 from the business account each month currently. There are invoices to be paid which should mean they are able to draw out further funds in June and July and will then need additional income to support their income needs in retirement from August onwards.

Kevin gets a State Pension of £954.15 every 4 weeks.

Expenditure is approx £2,966.50 (Not inc Savings as detailed on Budget Planner which would take it up to £3,966.50).

They would like income of £3,500 net in retirement which is what they are used to.

No major expenditure is planned apart from some house renovations and work in the garden which they will use their ISA's to cover.

## Retirement Goals & Objectives Notes

1) Angela and Kevin are retiring on May the 29th.

2) Ideal income which they will need from August onwards is £3,500 per month

3) They both have existing private pension which they have had very little involvement with and have not paid into since about 2008. They want to understand their options with these pensions and use them as part of their income in retirement strategy. Ideally they want to simplify things.

4) Preference is to be able to use these funds to help support their changing income needs as they will only have Kevin's State Pension for the next 3 years until Angela gets her State Pension

5) They both confirmed they want to be invested in line with their agreed risk level

We discussed Annuities and Drawdown and I walked them through the advantages and disadvantages of each approach. Angela and Kevin feel that as their State Pension will cover a good proportion of their income need that they would prefer to have the flexibility to use their funds as and when required for both regular income and capital lump sums. Tax efficiency is important as they have paid tax all their lives and if they can pay as little tax as possible in retirement they will be happy. Ultimately they want the girls to benefit if anything were to happen to them.

Initial Advice to focus on doing a UFPLS of £1,396.66pm for Angela which will use up her PA with remaining income being drawn from their Variable rate Cash ISA's. At this moment in time we do not know what her income will be for this Tax Year as waiting for their accountant to confirm this but we can alter this in a few months if figures not clarified prior to advice.

## Existing Pension Provision

## Notes

Angela and Kevin have both completed a Defaqto ATRQ as part of the Initial Advice process. Angela came out as a Risk Level 4 and Kevin came out as a Risk Level 5. This does surprise me as Angela thought she would be more comfortable with investment risk when we discussed it during the initial meeting.

### Angela

K&E - Angela has very little to no understanding of more complex investments but is very comfortable with Cash Based Investment as this is what her and Kevin have used to build up their personal savings with over the years. She does have a little bit of knowledge around Stocks & Shares and UT/GIA's in terms of what they are and how they work. Angela has also been invested through her pension funds but has never been involved in any investment decisions. They have been business owners so are used to the risks that this brings to the table.

ATR - Angela thinks her overall approach to any invested capital would be looking at it from a Balanced point of view and is prepared to take some risk with a percentage of her assets. However as she has no experience she would be worried about exposing too much of her capital and would prefer a slight risk and thinks her initial preference would be more around low risk investments. Angela does understand that in order for her investments to keep pace with inflation she does need to take some risk but would be concerned if any capital suffered losses of between 5 & 12.5% and she would get worried due to her lack of experience.

CFL - Angela and Kevin are in a good position to meet their retirement expenditure and known lifestyle needs. Their income need is £3,500pm and Kevin has his state pension which is approx £1,033pm. They have approx £284,500 in combined pension funds and approx £262,000 In Cash ISA's to help support their regular income need and any future capital lump sum needs. Angela will get her State Pension is just over 3 years time. Prior to this they will need £2,467 per month which is £30,000 Net pa for the first 3 a bit years and when Angela gets her SP they will need circa £1,500pm which is £18,000 net each year.

I would say that Angela has a medium capacity for loss at this stage which more or less matches the risk level she is prepared to take.

### Kevin

K&E - Kevin has very little to no understanding of more complex investments but is very comfortable with Cash Based Investment as this is what he and Angela have used to build up their personal savings with over the years. He does have a fair degree of knowledge around Stocks & Shares and some understanding of UT/GIA's & Pensions & Income in Retirement in terms of what they are and how they work. Kevin has also been invested through his pension funds but has never been involved in any investment decisions. They have been business owners so are used to the risks that this brings to the table.

ATR - Kevin seems comfortable taking a balanced approach and would prefer to use medium risk investment to meet his objectives. He understands there are ups and downs when it comes to investing and has a good basic understanding of what investments are but not necessarily the knowledge about how they work. Kevin thinks risk provides an opportunity for growth and is willing to take some risk with some of his assets and based on his answer he would not get anxious or uncomfortable with short term losses unless they went above 20%. However he also states he would prefer a slight risk to his capital which maybe is not in line with his other answers.

CFL - Angela and Kevin are in a good position to meet their retirement expenditure and known lifestyle needs. Their income need is £3,500pm and Kevin has his state pension which is approx £1,033pm. They have approx £284,500 in combined pension funds and approx £262,000 In Cash ISA's to help support their regular income need and any future capital lump sum needs. Angela will get her State Pension is just over 3 years time. Prior to this they will need £2,467 per month which is £30,000 Net pa for the first 3 a bit years and when Angela gets her SP they will need circa £1,500pm which is £18,000 net each year.

I would say that Kevin has a medium capacity for loss at this stage which matches the risk level he is prepared to make
