## Product(s) summary from 24/11/2022 to 23/11/2025

This is a summary of the headline figures from your product(s).

**Opening value:**

**£59,017.42**

**Closing value:**

**£79,092.32**

|                 |            |
|-----------------|------------|
| £ Opening value | £59,017.42 |
| Money in        | £0.50      |
| Money out       | £0.00      |
| £ Closing value | £79,092.32 |

**Change in value** +£20,074.91

**Return** +34.02%

The return performance figures and 'change in value' metrics will always return data based on all sub-accounts within the account, regardless of selection made on builder page.

The return % has been calculated using the Simple Return basis

| Portfolio total                                                                                                   | £59,017.42    | £0.50    | £0.00     | £0.00             | £20,074.91      | 34.02% | £79,092.32    |

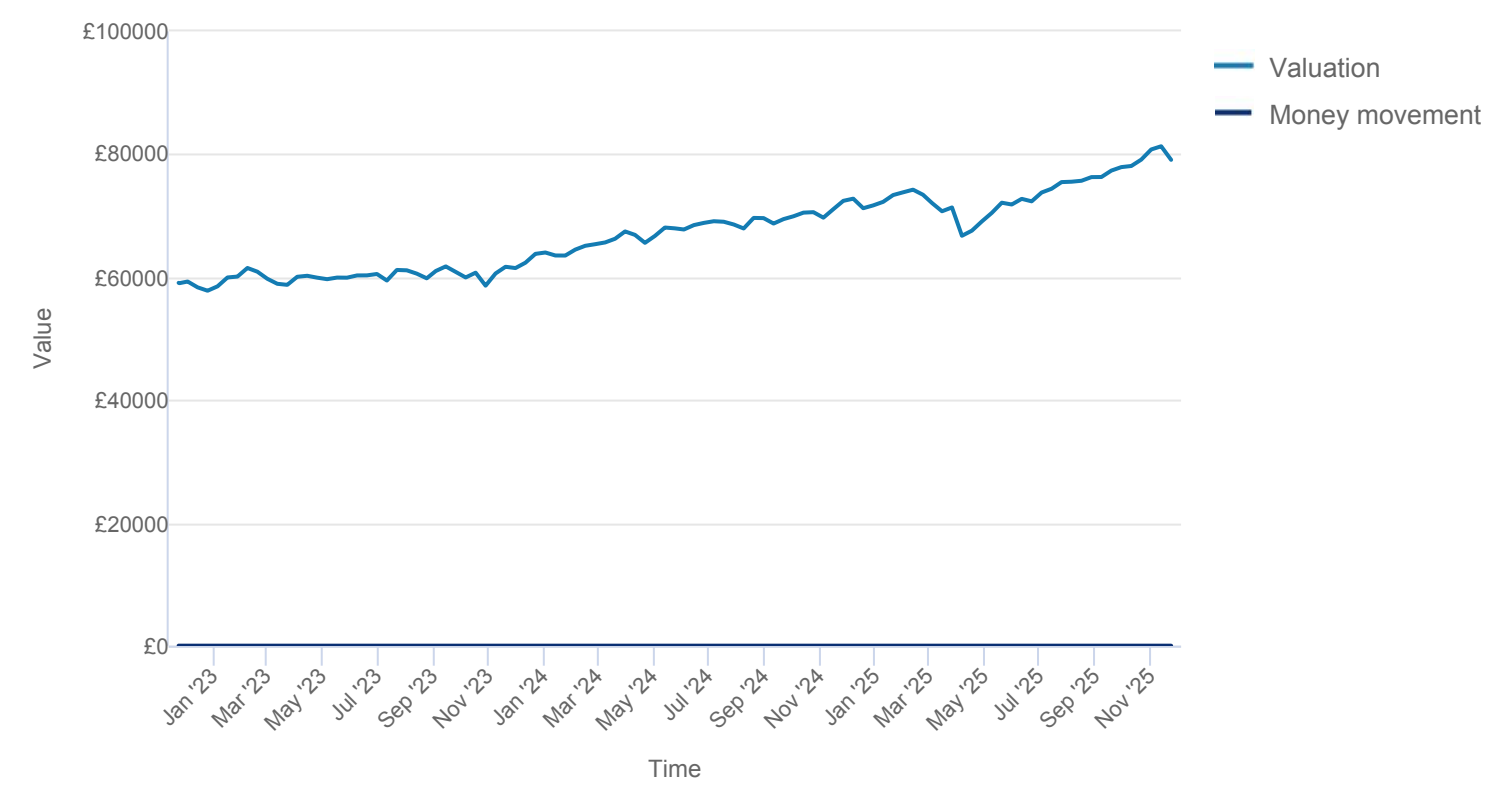

The return has been calculated using a **Simple Return** basis.

This is the percentage (%) measure to show how your investments have performed over the selected time period, without any adjustment for the date that each transaction occurred. It's calculated by dividing the change in value by the total amount invested, less any money out, over the time period.

# Performance

## Valuation and money movements from 24/11/2022 to 23/11/2025

This is a graph of your product(s) valuation and money movements plotted over time.

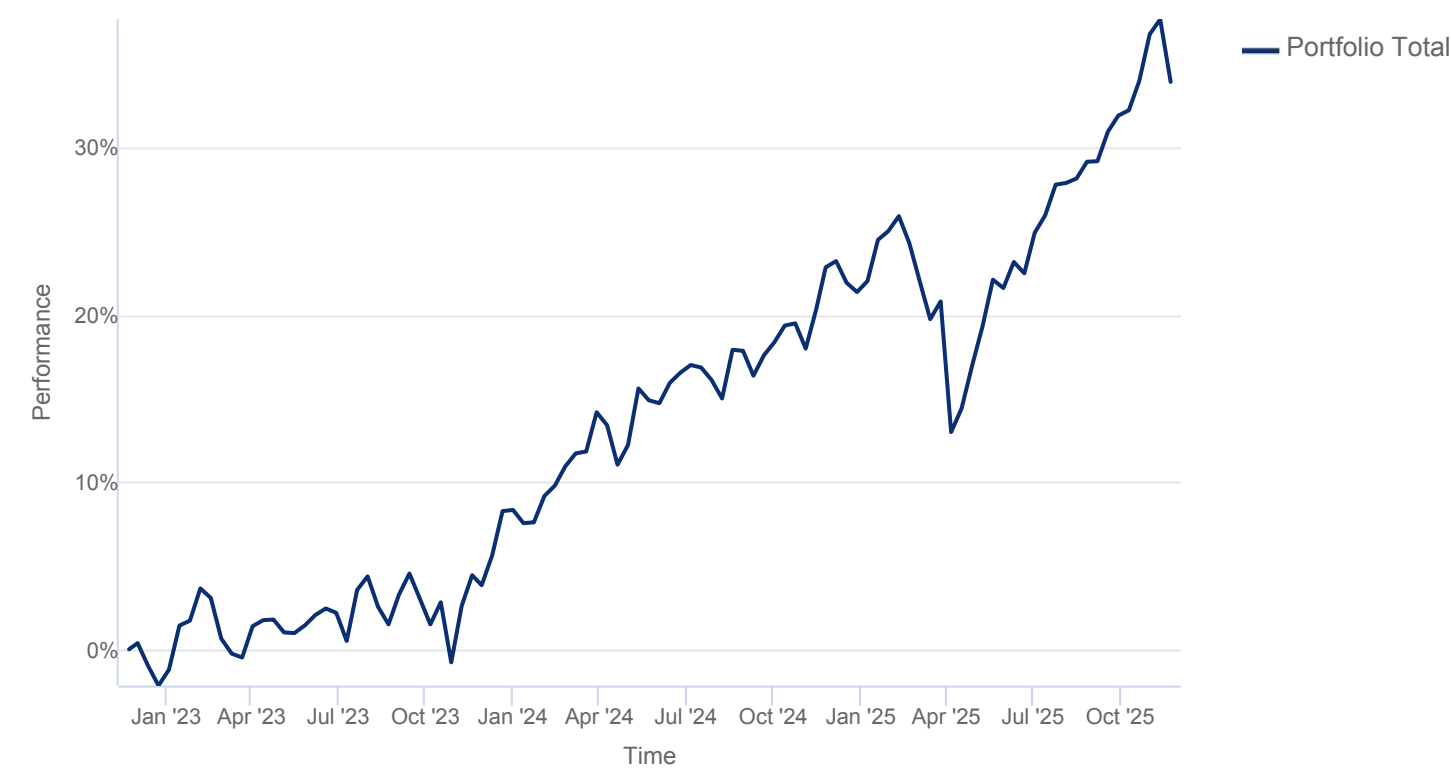

| Product | Opening value | Money In | Money out | Change in value | Return | Closing value |
|---------|---------------|----------|-----------|-----------------|--------|---------------|
| Total   | £59,017.42    | £0.50    | £0.00     | £20,074.91      | 34.02% | £79,092.32    |

# Performance

## Cumulative performance from 24/11/2022 to 23/11/2025

This is a graph of your investment performance plotted over time. The performance figures do not include product charges, money paid in or out.

| Investment      | 3 months | 1 year | 3 years | 5 years | Since<br>24 November<br>2022 |
|-----------------|----------|--------|---------|---------|------------------------------|
| Portfolio total | 3.73%    | 9.43%  | 33.91%  | 41.83%  | 33.91%                       |

Cumulative performance is the percentage growth over the period shown. All cumulative performance figures are up until the last price point. Where no past performance figure is shown for the product(s) then performance does not exist for that time period, as the product(s) may not have been available for the full time period.

The benchmark used for comparison purposes assumes that any income generated is reinvested.

The performance calculation does not include money paid into or taken out of your product(s) and represents the actual growth of the investments in your product(s). However, please note the past performance figures do not take into account product charges which may reduce the amount you get back from an investment.

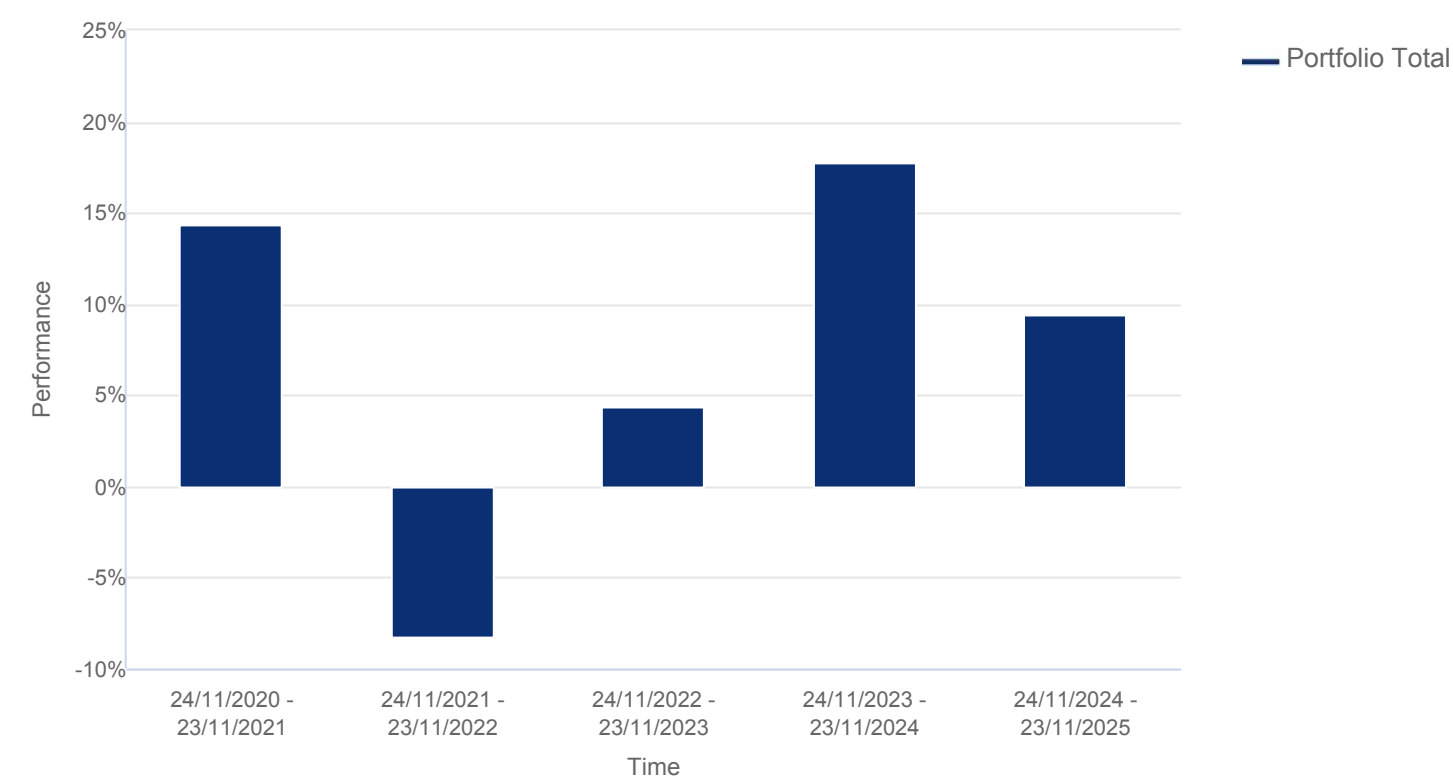

More information about charges and how these affect your investment can be found in Your Guide to Charges and Your Personalised Charges Information Documents from your adviser.

# Performance

## Discrete portfolio performance from 24/11/2022 to 23/11/2025

This is a graph of your investment performance plotted over a defined 12 month time period. The performance figures do not include product charges, money paid in or out.

| Investment      | 24/11/2020<br>- 23/11/2021 | 24/11/2021<br>- 23/11/2022 | 24/11/2022<br>- 23/11/2023 | 24/11/2023<br>- 23/11/2024 | 24/11/2024<br>- 23/11/2025 |
|-----------------|----------------------------|----------------------------|----------------------------|----------------------------|----------------------------|
| Portfolio total | 14.35%                     | -8.21%                     | 4.40%                      | 17.71%                     | 9.43%                      |

Discrete performance is the percentage growth during a defined 12 month period. All discrete performance figures are up until the end of the last quarter. Where no past performance figure is shown for the product(s) then performance does not exist for that time period, as the product(s) may not have been available for the full time period.

The benchmark used for comparison purposes assumes that any income generated is reinvested.

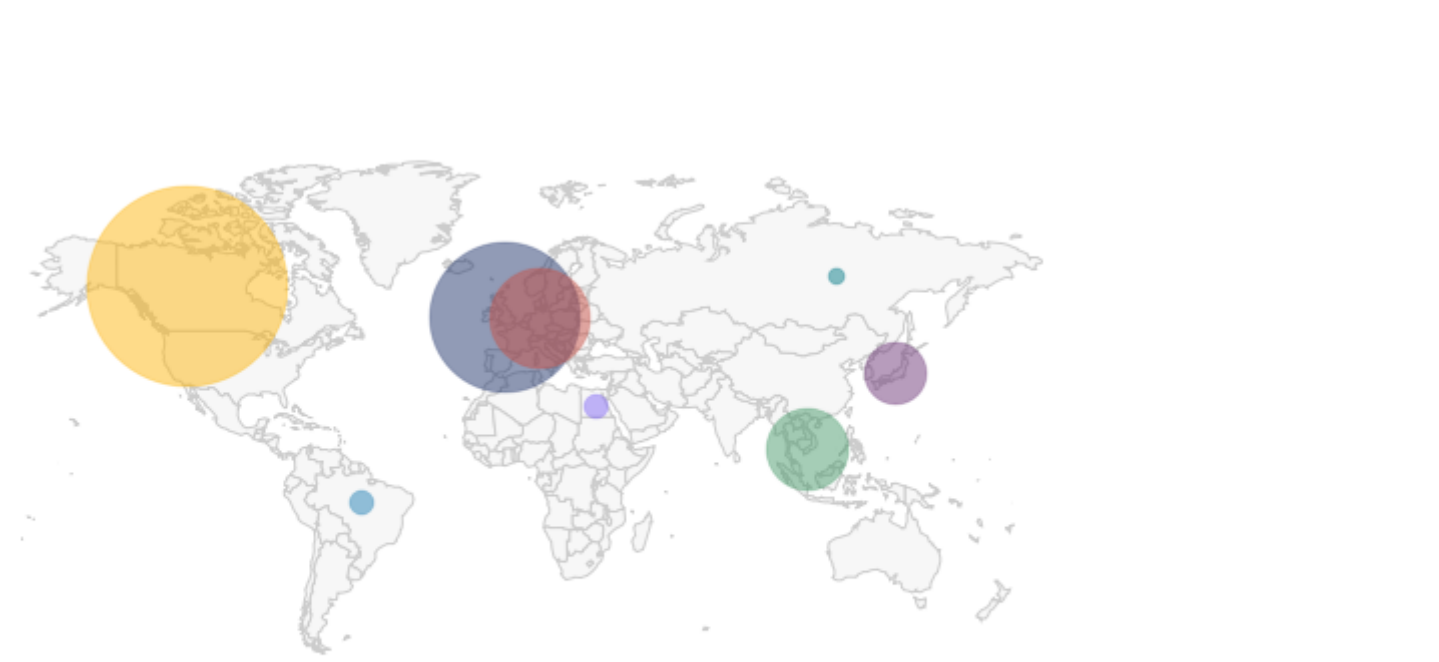

The performance calculation does not include money paid into or taken out of your product(s) and represents the actual growth of the investments in your product(s).

However, please note the past performance figures do not take into account product charges which may reduce the amount you get back from an investment.

More information about charges and how these affect your investment can be found in Your Guide to Charges and Your Personalised Charges Information Documents from your adviser.
