Market Value Reduction

A clear explanation

What's a Market Value Reduction?

If you withdraw or switch money from a with-profits fund, you may get less than the value of your plan as shown on the last policy statement we sent you. This is so that we can make sure everyone invested in a with-profits fund gets a fair share of the profits. We call this a Market Value Reduction (MVR), as what we'll pay out is based on the underlying market value of the investments.

How a with-profits fund works

Instead of paying you direct returns (such as dividends), a with-profits fund typically pays you a share of its profits via bonuses that are added to the value of your plan.

In deciding how much a bonus should be, we use a process called 'smoothing'. This means when the value of investments goes up, we may hold back some of the money we would otherwise pay to investors in their bonuses. As a result, when the value of investments goes down, it's more likely we will still be able to pay bonuses. This 'smoothes' the impact on your returns of sharp rises and falls in the market.

Why we sometimes apply an MVR to a with-profits fund

The prices of assets traded on financial markets usually move up or down a bit every day. But sometimes, there can be a very sharp fall in the markets – such as during the COVID-19 Pandemic.

If lots of investors pull their money out of a with-profits fund after a sharp fall in its value, there's a risk they could get an unfairly large share of the fund's profits. This would leave remaining investors worse off. So, an MVR protects investors who aren't taking their money out, and means that you get a return based on the earnings of the with-profits fund over the period your payments have been invested.

So, if you tell us you want to make a withdrawal or a transfer from a with-profits fund, we might decide to apply an MVR to your transaction. This means you'll get less than the value of your plan, as shown in your last statement.

An MVR means we can be fair to all investors

The money the MVR holds back from your withdrawal or transfer doesn't go to us. Instead, it's kept in the fund, where it's used to protect those who remain invested. An MVR aims to balance returns for investors who stay in the fund with those who leave.

For example:

Imagine that five investors all have equal, £10,000 stakes in a single fund worth £50,000.

The value of the fund falls by 20%, and it is now worth £40,000. One investor, Angela, decides to leave, but her stake isn't adjusted to allow for the recent fall in value. She gets £10,000.

The remaining £30,000 is divided between the four investors who stay in the fund – so they're down to £7,500 each.

An MVR applied to Angela's withdrawal, resulting in Angela being paid £8,000 might have felt unfair to her. But it would have been the fairest thing to everyone with a stake in the fund.

When an MVR will apply to your transaction

We apply MVRs on a case-by-case basis. We may decide to apply an MVR if:

- the value of your plan is greater than the value of the assets your money is invested in

and you do one of the following:

- switch into another investment fund (including between with-profits funds)
- cash in or transfer your plan
- take early or late retirement
- take a full or partial withdrawal from your plan (if allowed)
- pay adviser charges from a with-profits fund
- take certain regular withdrawals.

We may change our MVR practice at any time without giving prior notice. For example, it may be altered if there's a significant reduction in the value of the investment markets in which our with-profits funds invest, or if there's a significant increase in the number of people wanting to cash-in their with-profits investments.

If we make a change to our current practice, it would apply to all new plans and existing plans in place at the time of the change.

How an MVR will affect the value of your transaction

An MVR isn't a fixed amount. The reduction will depend on:

- how much your plan is worth, including any bonuses that have been applied to it
- the performance of the with-profits fund over the time you've been invested in it.

When an MVR will not apply to your transaction

You'll only be affected by an MVR if you want to withdraw or transfer your money. Otherwise, it won't affect you. We also guarantee not to apply an MVR:

- if the investor has died
- at the selected/normal retirement date of a pension plan
- at the anticipated annuitisation age of a relevant income drawdown plan
- at the maturity of an endowment plan.

If you want to know more

You can find more information on MVRs in your product Key Features and policy documentation.

You can also refer to our 'Customer-Friendly Principles and Practices of Financial Management' documents in the 'Unitised and Cash Accumulation With-Profits' section, which can be found at pru.co.uk/ppfm

You can call us on 0800 000 000 Monday to Friday 8am to 6pm. We might record your call for training and quality purposes.

Transferring a pension

Dear Sir or Madam

- The transfer value of this pension is £33,723.69 on 5 June 2026. This value isn't guaranteed and could go down as well as up.
- The planholder's pension has a valuable benefit and if they decide to transfer, they would lose this.

Thanks for letting us know that the planholder would like to transfer this pension.

- We've given you the transfer value and information to help the planholder make sure that a transfer is right for them.
- If the planholder decides to transfer, there are some forms they need to complete and the new provider will also ask you or the planholder for information. We've enclosed all forms and included instructions in the 'Transfer document checklist'.
- Once we have everything we need, we'll send the transfer payment directly to the new provider, and we'll let you know when this has happened.

Helping the planholder make the right decision

Choosing to transfer a pension is a big decision. Once the planholder has transferred, they might not be able to change their mind. To fully understand the planholder's options and make the right choice:

1. Read this letter and other enclosed documents carefully.
2. The planholder should consider seeking financial advice for major financial decisions.

The transfer value – what the pension's worth now

Transfer value on 5 June 2026	£33,723.69
----------------------------------	------------

This transfer value isn't guaranteed

This value isn't guaranteed and could go down as well as up.

The planholder will find more detailed information about the transfer value in the enclosed document 'Transfer value'.

Valuable benefits the planholder could lose

The planholder's pension includes a valuable benefit. If they decide to transfer without considering this benefit, it could leave them worse off.

With-Profits investment

This pension includes investment in our With-Profits Fund which offers a mix of asset types and returns in the form of bonuses. Regular bonuses that are added over the term of the pension increase the guaranteed benefits and can't be taken away unless the planholder withdraws their money on a date when the guarantees don't apply.

Investment in our With-Profits Fund will end if the pension is transferred and the planholder may not be able to invest their transfer value in a similar fund with another provider.

Other options to consider

The planholder can leave their pension as it is

If the planholder decides not to go ahead with the transfer, things will keep going as they are. You don't have to contact us.

Now they're over the minimum pension age (currently 55), the planholder may be able to start taking money from their pension

If they take money from their pension earlier than planned, they're likely to have less money when they reach their original retirement date. If you want to talk it through, just give us a call.

Change to minimum pension age

The Government is changing the earliest age from which individuals can access their pension benefits. The normal minimum pension age (NMPA) will increase from age 55 to age 57 with effect from 6 April 2028.

The changes won't affect anyone taking benefits due to ill-health or those who already have a protected minimum pension age below 55.

Where an individual had an NMPA of 55 on their pension plan before 4 November 2021, this is also protected but would be lost on transfer unless certain prescribed conditions are met. For this reason, we suggest the planholder speaks to a financial adviser before deciding whether to go ahead with the transfer.

Next steps – what you need to do now

1. The planholder should consider seeking financial advice for major financial decisions.
2. Consider obtaining free and impartial guidance about transferring this pension from MoneyHelper at moneyhelper.org.uk

3. As the planholder is over 50, they can also get free and impartial guidance on their retirement options from Pension Wise (part of the government-backed MoneyHelper service). The planholder can arrange a free consultation online, over the phone or face-to-face. If they intend to take their retirement benefits once the pension transfer is complete, we suggest they speak to Pension Wise at the earliest opportunity as this will prevent unnecessary delays later in the transfer process. To book a free appointment, call 0800 100 166 or visit moneyhelper.org.uk/nudge-public. Alternatively, please contact us and we can help arrange this appointment for the planholder.
4. If the planholder wants to go ahead with the transfer, please follow the instructions in the enclosed 'Transfer document checklist'.
5. In order to protect the planholder from the risk of pension scams, some pension transfers are subject to certain regulatory conditions:
 - The first condition is that the transfer is to one of the following scheme types:
 - public sector scheme
 - Master Trust scheme
 - a collective money purchase scheme (CDC)

You can check the receiving scheme type with the new provider.

- If the transfer is not to one of these schemes, we're required to carry out further checks which could include asking for evidence of employment links for transfers to employer schemes and residency links for transfers to overseas schemes. In some cases, it might be necessary to review other aspects of the transfer such as the regulatory status of any third party advisers, whether unsolicited contact was involved, or whether other factors such as incentives influenced the decision to transfer.

We'll start these checks when we receive the completed documents and will let you know if further information is required. It's important to stress that we may have to decline the transfer request if at least one of these regulatory conditions can't be met.

6. Once we've received the required documents and are satisfied that the transfer can go ahead, we'll work with the new provider to transfer the pension, and we'll keep you updated along the way. When their requirements have been met, the new provider will contact us to start their transfer process.
7. If we have everything we need, we'll send the transfer payment directly to the new provider, and we'll let you know when this has happened. If anything is missing we'll ask the new provider to send it to us.
8. If the new provider is registered on the Origo Transfer Service (an internet based pension transfer system), the transfer may be able to be done without completing our paperwork. A representative of the new scheme will be able to confirm whether the transfer can be done this way. If the new scheme uses the Origo Transfer Service, they will need to quote the reference 50094231.

We're here to help

If you need more information or have any questions, please contact us and we'll be happy to help. So that we can deal with your queries quickly and efficiently, please quote the reference shown at the top of this letter.

If you have hearing or speech difficulties you can contact us using Relay UK or SignVideo. For more information please visit pru.co.uk/signrelay

If your company changes email or postal address, landline or mobile number, please let us know so that we can keep in contact with you.

Yours faithfully

ANGELA STEAD

Plan number(s)	50094231
Planholder	Mrs ANGELA STEAD
Total transfer value on 5 June 2026	
£33,723.69	

This transfer value isn't guaranteed

This value isn't guaranteed and could go down as well as up.

How we've calculated the transfer value

Plan number	Fund value	Final Bonus added (included in Transfer value)	Transfer value
50094231	£11,212.90	£22,510.79	£33,723.69

You'll find more information about the Final Bonus below.

Transfer value continued

Important Information about the With-Profits Fund

Final Bonus

When money is removed from the With-Profits Fund, we may add a Final Bonus. We calculate the Final Bonus based on the period the investment has been held continuously in the With-Profits Fund and the performance of the fund over that time. The Final Bonus amount can go up or down at any time and is not guaranteed.

The Final Bonus is included in the transfer value quoted above.

Market Value Reduction

A Market Value Reduction (MVR) is an amount we might deduct when money is withdrawn from the With-Profits Fund. We would do this if the value of the underlying assets of the fund is less than the value of the plan (including bonuses).

An MVR ensures that planholders who take money out receive a return based on the performance of the fund over the period they were invested. It protects planholders who leave their money invested and is our way of being fair to all of our With-Profits investors.

We are pleased to confirm that we haven't applied an MVR to this transfer value at this time.

More information

You'll find more information on MVRs in the enclosed leaflet 'MVR - A clear explanation'.

The Principles and Practices of Financial Management (PPFM) describes how we manage your With-Profits investments.

A copy of our PPFM and our product-specific, customer friendly PPFMs are available on our website at pru.co.uk/with-profits or by contacting us.

Our Directors' report shows how we've complied with these principles and practices. You can find this along with our most recent With-Profits Actuary's Report on our website. You'll also find a summary of notable changes we've made in the past or any notable changes we plan to make to the PPFM. If you'd like a written copy, give us a call.

Transfer document checklist

Please ensure all forms have been fully and accurately completed, and all of the documents listed below are sent to us or the new provider / receiving scheme as indicated.

To be completed by the planholder, member or trustee		✓
Transfer discharge form	This form gives us the authority to transfer this pension to the new provider. It must <u>always</u> include the name and address of the pension provider receiving the transfer payment. The form must be fully completed and signed by the planholder.	
Pension Wise declaration	This must be fully completed and signed by the planholder.	

To be sent to / completed by the new provider / receiving pension scheme		✓
Transferring scheme information	Please send this to the new provider. They use this information when they're setting up the receiving scheme to receive the transfer value.	
Receiving scheme HMRC registration letter	Please request this from the new provider. The new pension scheme manager should be able to provide a copy.	
Receiving scheme's transfer statement	Please send this to the new provider. It should be completed and signed by an authorised representative of the receiving pension scheme. The new provider can send it back to us directly.	

We'll only be able to process this transfer once we've received the correctly completed documents.

Please return completed forms and documents to:

Prudential
LANCING
BN15 8GB

Phone: 0345 640 2000

Transfer discharge form

To be completed by the planholder.

Plan number(s)	50094231
Planholder	Mrs ANGELA STEAD

Please remember: The amount paid will be recalculated when we pay the transfer and may be higher or lower than the transfer value quoted previously.

Any incomplete or missing information will delay the transfer payment to the receiving scheme.

I authorise you to transfer the above pension plan to:

(Please provide the full name and address of the pension provider or pension scheme set to receive the transfer payment.)

Name of new scheme/pension provider	
Address	
Postcode	
Reference number	
New contact name	
New contact telephone number	
New contact e-mail address	

Please add any special instructions regarding this transfer in the box below:

Special instructions	
----------------------	--

How we use your personal information

For a copy of our latest Data Protection Notice, please visit pru.co.uk/mydata. This details how and why we use your personal information (including any sensitive personal information), who we may share it with and your rights around your personal information. Alternatively, you can request a hard copy to be sent to you by writing to The Data Protection Officer, Customer Service Centre, LANCING, BN15 8GB.

Transfer discharge form continued

Please note that we collect personal information from you that is necessary for us to either provide you with the product or service you've requested or to comply with statutory or contractual requirements. Unfortunately if you don't provide all of the information we require this may mean we are unable to provide our products and services to you.

Planholder's declaration and authority – please read and sign below

Please read this declaration carefully before signing it. If you believe one or more of the statements below is/are not true in relation to the proposed transfer, and as a result you can't sign the declaration, we may not be able to proceed with the transfer.

In relation to the plan listed above, I hereby declare:

- I agree to, and request, the transfer of benefits as indicated above.
- I understand that the transfer value is not guaranteed. It will be recalculated before the payment is made, and may be higher or lower than the amount shown previously.
- I am the legal owner of the plan and am legally entitled to instruct you to transfer the value. I have never been adjudged to be bankrupt, there are no court orders and/or insolvent events affecting my plan.
- I understand and agree that payment of the transfer value will be in discharge of your liabilities in respect of the benefits under the plan number stated above. For the avoidance of doubt, this discharge won't stop me from raising a claim relating to any act or omission by Prudential in relation to the plan.
- I understand that if I have any entitlement under the Prudential plan(s) to a protected tax-free lump sum, this may be lost upon transfer; unless part of a block transfer or if I've also registered for primary or enhanced protection. A protected pension age may also be lost upon transfer.

My date of birth is 16 October 1962.

- I declare that my date of birth shown and that the statements that I have made are correct and complete. I understand that making a false declaration may result in tax charges and other penalties.
- I promise that I will be responsible for any losses and/or expenses which are the result, and which a reasonable person would consider to be the probable result, of any untrue, misleading or inaccurate information carelessly given by me, or on my behalf, either in this form or with respect to benefits from the plan(s).
- I also promise that I will be responsible for any losses and/or expenses which are the result of any untrue, misleading, or inaccurate information deliberately given by me, or on my behalf, either in this form or with respect to the benefits from the plan(s).

If you're concerned or have queries about one of the statements, please don't hesitate to contact us.

If you've previously been adjudged bankrupt; subject to a Debt Relief Order, Individual Voluntary Arrangement, Administration Order or another insolvent event; or your plans are/have been potentially affected by any other court orders, so that we can make the appropriate enquiries to decide whether or not the transfer can proceed, please contact us and provide us with relevant details/documentation, such as:

- a copy of the Order concerned
- court/insolvency service reference number
- details of the court or insolvency service office, official receiver's office, insolvency practitioner and/or solicitors.

If you believe all other relevant parties concerned have consented to the transfer, please provide documentation to confirm. Please note we can't provide you with legal, financial or tax advice, and you should obtain such advice independently if you feel it's required.

Receiving scheme's transfer statement

Section 1 – Details of transferring scheme/planholder

Planholder name	Mrs ANGELA STEAD
Planholder date of birth	16 October 1962
Planholder NI number	NA407095C
Plan number(s)	50094231

Section 2 – Details of receiving scheme

This document should only be used for a transfer to a UK-registered pension scheme.

Full name of receiving scheme/ provider	
Your plan number	
HMRC reference (PSTR or SF number)	
Scheme administrator's name	
Scheme administrator's address	
Postcode	
Name of contact (in case of enquiry)	
Telephone number	
Email address	

Type of scheme – the scheme is: (please tick the relevant box)

- A) A pension scheme registered under Chapter 2, Part 4 of the Finance Act 2004. ☐
- B) A statutory pension scheme (as defined in Chapter 1, Part 4 of the Finance Act 2004). ☐
- C) A registered pension scheme under paragraph 1 of Schedule 36 to the Finance Act 2004. ☐

If you've ticked option A or C, please enclose a copy of the scheme's HMRC registration document.

Transfer statement continued

Additional details

Is the scheme:

- | | | |
|---|------------------------------|-----------------------------|
| (i) a non-insured self-administered scheme or a Self-Invested Pension Plan? | Yes ☐ | No ☐ |
| (ii) an insured scheme? | Yes ☐ | No ☐ |
| (iii) a Public Service Pension Scheme as defined in s150(3) FA2004? | Yes ☐ | No ☐ |
| (iv) a buy-out (deferred annuity) contract? | Yes ☐ | No ☐ |

If the scheme is an insured scheme, or a buy-out contract, we will usually make payment only to the life office insuring the scheme or contract.

Section 3 – Payment details

Please note that if your scheme is fully insured then we will pay the transfer payment directly to the new insurance company, in accordance with HMRC requirements. If the transfer is to a non-insured scheme we will pay directly to the receiving provider or administrator.

Our preferred method of payment is BACS.

(a) If you would prefer payment by BACS please provide us with details of the account into which you would like payment to be made.

Sort code

Market Value Reduction

A clear explanation

What's a Market Value Reduction?

If you withdraw or switch money from a with-profits fund, you may get less than the value of your plan as shown on the last policy statement we sent you. This is so that we can make sure everyone invested in a with-profits fund gets a fair share of the profits. We call this a Market Value Reduction (MVR), as what we'll pay out is based on the underlying market value of the investments.

How a with-profits fund works

Instead of paying you direct returns (such as dividends), a with-profits fund typically pays you a share of its profits via bonuses that are added to the value of your plan.

In deciding how much a bonus should be, we use a process called 'smoothing'. This means when the value of investments goes up, we may hold back some of the money we would otherwise pay to investors in their bonuses. As a result, when the value of investments goes down, it's more likely we will still be able to pay bonuses. This 'smoothes' the impact on your returns of sharp rises and falls in the market.

Why we sometimes apply an MVR to a with-profits fund

The prices of assets traded on financial markets usually move up or down a bit every day. But sometimes, there can be a very sharp fall in the markets – such as during the COVID-19 Pandemic.

If lots of investors pull their money out of a with-profits fund after a sharp fall in its value, there's a risk they could get an unfairly large share of the fund's profits. This would leave remaining investors worse off. So, an MVR protects investors who aren't taking their money out, and means that you get a return based on the earnings of the with-profits fund over the period your payments have been invested.

So, if you tell us you want to make a withdrawal or a transfer from a with-profits fund, we might decide to apply an MVR to your transaction. This means you'll get less than the value of your plan, as shown in your last statement.

An MVR means we can be fair to all investors

The money the MVR holds back from your withdrawal or transfer doesn't go to us. Instead, it's kept in the fund, where it's used to protect those who remain invested. An MVR aims to balance returns for investors who stay in the fund with those who leave.

For example:

Imagine that five investors all have equal, £10,000 stakes in a single fund worth £50,000.

The value of the fund falls by 20%, and it is now worth £40,000. One investor, Angela, decides to leave, but her stake isn't adjusted to allow for the recent fall in value. She gets £10,000.

The remaining £30,000 is divided between the four investors who stay in the fund – so they're down to £7,500 each.

An MVR applied to Angela's withdrawal, resulting in Angela being paid £8,000 might have felt unfair to her. But it would have been the fairest thing to everyone with a stake in the fund.

When an MVR will apply to your transaction

We apply MVRs on a case-by-case basis. We may decide to apply an MVR if:

- the value of your plan is greater than the value of the assets your money is invested in

and you do one of the following:

- switch into another investment fund (including between with-profits funds)
- cash in or transfer your plan
- take early or late retirement
- take a full or partial withdrawal from your plan (if allowed)
- pay adviser charges from a with-profits fund
- take certain regular withdrawals.

We may change our MVR practice at any time without giving prior notice. For example, it may be altered if there's a significant reduction in the value of the investment markets in which our with-profits funds invest, or if there's a significant increase in the number of people wanting to cash-in their with-profits investments.

If we make a change to our current practice, it would apply to all new plans and existing plans in place at the time of the change.

How an MVR will affect the value of your transaction

An MVR isn't a fixed amount. The reduction will depend on:

- how much your plan is worth, including any bonuses that have been applied to it
- the performance of the with-profits fund over the time you've been invested in it.

When an MVR will not apply to your transaction

You'll only be affected by an MVR if you want to withdraw or transfer your money. Otherwise, it won't affect you. We also guarantee not to apply an MVR:

- if the investor has died
- at the selected/normal retirement date of a pension plan
- at the anticipated annuitisation age of a relevant income drawdown plan
- at the maturity of an endowment plan.

If you want to know more

You can find more information on MVRs in your product Key Features and policy documentation.

Market Value Reduction

A clear explanation

What's a Market Value Reduction?

If you withdraw or switch money from a with-profits fund, you may get less than the value of your plan as shown on the last policy statement we sent you. This is so that we can make sure everyone invested in a with-profits fund gets a fair share of the profits. We call this a Market Value Reduction (MVR), as what we'll pay out is based on the underlying market value of the investments.

How a with-profits fund works

Instead of paying you direct returns (such as dividends), a with-profits fund typically pays you a share of its profits via bonuses that are added to the value of your plan.

In deciding how much a bonus should be, we use a process called 'smoothing'. This means when the value of investments goes up, we may hold back some of the money we would otherwise pay to investors in their bonuses. As a result, when the value of investments goes down, it's more likely we will still be able to pay bonuses. This 'smoothes' the impact on your returns of sharp rises and falls in the market.

Why we sometimes apply an MVR to a with-profits fund

The prices of assets traded on financial markets usually move up or down a bit every day. But sometimes, there can be a very sharp fall in the markets – such as during the COVID-19 Pandemic.

If lots of investors pull their money out of a with-profits fund after a sharp fall in its value, there's a risk they could get an unfairly large share of the fund's profits. This would leave remaining investors worse off. So, an MVR protects investors who aren't taking their money out, and means that you get a return based on the earnings of the with-profits fund over the period your payments have been invested.

So, if you tell us you want to make a withdrawal or a transfer from a with-profits fund, we might decide to apply an MVR to your transaction. This means you'll get less than the value of your plan, as shown in your last statement.

An MVR means we can be fair to all investors

The money the MVR holds back from your withdrawal or transfer doesn't go to us. Instead, it's kept in the fund, where it's used to protect those who remain invested. An MVR aims to balance returns for investors who stay in the fund with those who leave.

For example:

Imagine that five investors all have equal, £10,000 stakes in a single fund worth £50,000.

The value of the fund falls by 20%, and it is now worth £40,000. One investor, Angela, decides to leave, but her stake isn't adjusted to allow for the recent fall in value. She gets £10,000.

The remaining £30,000 is divided between the four investors who stay in the fund – so they're down to £7,500 each.

An MVR applied to Angela's withdrawal, resulting in Angela being paid £8,000 might have felt unfair to her. But it would have been the fairest thing to everyone with a stake in the fund.

When an MVR will apply to your transaction

We apply MVRs on a case-by-case basis. We may decide to apply an MVR if:

- the value of your plan is greater than the value of the assets your money is invested in

and you do one of the following:

- switch into another investment fund (including between with-profits funds)
- cash in or transfer your plan
- take early or late retirement
- take a full or partial withdrawal from your plan (if allowed)
- pay adviser charges from a with-profits fund
- take certain regular withdrawals.

We may change our MVR practice at any time without giving prior notice. For example, it may be altered if there's a significant reduction in the value of the investment markets in which our with-profits funds invest, or if there's a significant increase in the number of people wanting to cash-in their with-profits investments.

If we make a change to our current practice, it would apply to all new plans and existing plans in place at the time of the change.

How an MVR will affect the value of your transaction

An MVR isn't a fixed amount. The reduction will depend on:

- how much your plan is worth, including any bonuses that have been applied to it
- the performance of the with-profits fund over the time you've been invested in it.

When an MVR will not apply to your transaction

You'll only be affected by an MVR if you want to withdraw or transfer your money. Otherwise, it won't affect you. We also guarantee not to apply an MVR:

- if the investor has died
- at the selected/normal retirement date of a pension plan
- at the anticipated annuitisation age of a relevant income drawdown plan
- at the maturity of an endowment plan.

If you want to know more

You can find more information on MVRs in your product Key Features and policy documentation.

Plan information

Dear Sir or Madam

Thank you for your recent enquiry.

We receive a large number of requests for plan information and these requests are often in different formats. To streamline the process, we now issue a standard letter which includes the information that is most often requested.

Please find enclosed the following for the above member:

- A current valuation
- Plan information
- Projection(s)
- A Market Value Reduction factsheet 'Market Value Reduction – A clear explanation'
- Retirement brochure
- Plan valuation

The member has reached an age where there's more flexibility around how they can access their pension.

We've enclosed 'Your pension, your choice' brochure which gives the planholder more information to help them make an informed decision about their future.

The latest date we can provide a projection to, is the first of the month that the plan holder turns 75. Please note that your request regarding the other plan will be dealt with separately. Please note that we are unable to send the information by email.

We're here to help

If you need more information or have any questions, please contact us and we'll be happy to help. So that we can deal with your queries quickly and efficiently, please quote the reference shown at the top of this letter.

If you have hearing or speech difficulties you can contact us using Relay UK or SignVideo. For more information please visit pru.co.uk/signrelay

If your company changes email or postal address, landline or mobile number, please let us know so that we can keep in contact with you.

Yours faithfully

Lines open Monday to Friday, 8am to 6pm

Current values

Plan number

50094231

Planholder

ANGELA STEAD

Please read the 'Important notes' section at the end of this document.

The values quoted are correct as at 4 June 2026.

Plan number	Fund value	Final Bonus added (included in Transfer value)	Transfer value	Death value
50094231	£11,211.92	£22,506.15	£33,718.07	£33,718.07

Important notes

The values shown are not guaranteed and can go down or up depending on investment performance.

Fund value

The fund value is the current value of the member's plan before any Final Bonus or deductions are included. It will include all Regular Bonuses applied to date.

It's equal to the value of the benefits held in the member's chosen investment fund(s).

Transfer value

The transfer value is the amount that would be paid if the plan was to be transferred to another provider including any deductions. Please note that if the member was to decide to proceed with a transfer, the amount we'd pay would be equal to the transfer value of the plan as at the date we receive all of our requirements to process the transfer.

We can only pay the transfer value to another UK registered pension scheme or to a Qualifying Recognised Overseas Pension Scheme (QROPS).

The transfer value for the plan listed includes a Final Bonus. The value of the Final Bonus can go down or up depending on investment performance, so isn't guaranteed. There may also be an MVR deduction – see below.

Death value

The terms and conditions for each individual plan determine the way we calculate this amount.

The death value for the plan shown, includes a Final Bonus. No MVR deduction has been applied.

If the member would like to know more, please refer to the plan's terms and conditions or contact us.

Final Bonus

A Final Bonus is an additional bonus we may pay when money is taken out of the Prudential With-Profits Fund. If the investment return has been low over the lifetime of the plan, a Final Bonus may not be paid. Final Bonus, which is only applied at the time benefits become payable, may vary and is not guaranteed.

"Prudential" is a trading name of The Prudential Assurance Company Limited which is registered in England and Wales. Registered office at 10 Fenchurch Avenue, London, EC3M 5AG. Registered number 15454. Authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority.

Pension projection continued

Illustration of your pension fund

What you might get back when you're 65

The following figures show what pension income you might get in today's prices to give you an idea of what your pension could be worth when you're 65. They've been adjusted to allow for inflation (the rising costs of goods and services) at an assumed rate of 2.00% each year. Actual inflation could be more or less than this. Inflation will reduce the buying power of what you might get back from your pension in the future and the value of all savings and investments.

Actual values might be lower or higher than those shown and your plan may pay back less than you've paid in. The projection is not a promise or guarantee and the figures are not minimum or maximum amounts.

The way we calculate the projection is set out by the regulator.

Assumed growth rates over the term of the plan (after allowing for the effects of inflation)	Low rate 0.00% a year	Mid rate 2.94% a year	High rate 5.88% a year
And interest rates when you retire are	2.90%	4.90%	6.90%
Your fund value could be	£33,200.00	£34,600.00	£35,900.00
This could give you:			
An estimated taxable yearly income for life with no tax-free cash of	£1,950.00	£2,480.00	£3,080.00
OR			
A tax-free cash payment of	£8,320.00	£8,650.00	£8,980.00
And an estimated smaller taxable yearly income for life of	£1,460.00	£1,860.00	£2,310.00

You can normally take up to 25% tax-free cash with most pension products. If you've any form of protection, this may mean you're entitled to more or less than this.

Assumptions and important notes

The figures in the projection assume you'll buy a lifetime annuity and that it'll be payable as follows:

- Single Life, monthly in advance for a minimum period of 5 years, and for your lifetime after that, with no increases.
- We've assumed a retirement date of 16 October 2027 at the age of 65.
- The projections shown have been based on the current fund holdings and associated charges and further costs, with no allowance for future switching.
- The Financial Conduct Authority (FCA) sets standard growth rates that companies can use in illustrations, but allow us to use other rates where appropriate. We've used growth rates that we feel give you the most realistic indication of potential future returns.

Pension projection continued

- Projections are calculated using a middle growth rate which we believe realistically reflects the investment potential of the product and the funds. We're also required by our regulator to provide additional projections using assumed growth rates 3% either side of this middle rate. In some circumstances, the yearly growth rates used have been limited, as required by our regulator, to 0% (lower rate), 3% (middle rate) and 6% (higher rate) after the effect of inflation. Where the growth rates we've used are higher than these rates it's because the fund(s) or some of the fund(s) you invest in provide specific guarantees in terms of minimum rates of return.
- The growth rates shown are an average based on all the funds you've chosen to invest in.
- Your investment in the With-Profits Fund offers a specific guarantee and this projection makes allowance for its effect. You should refer to your product literature or contact us for details of the specific guarantee that applies to this fund. General statements and warnings elsewhere within this illustration may still apply to the displayed values, due to other fund selections assumptions used in these calculations.
- The growth rates used in this illustration are reviewed on a regular basis. The timing of any reviews will mean the projections within this illustration may differ from those in any previous illustration you've received.
- For your pension to grow in real terms, your investments need to grow at a higher rate than the combined effect of inflation and charges (please note that charges may vary between different companies). In this illustration some of the projected values at retirement may be less than the total paid in. This is because the rate of investment growth we use to calculate those values is lower than the joint effect of charges and the rate we've assumed for inflation.
- Our charges, and the value of your pension, will depend on the funds you choose.
- Charges and costs may vary.
- The annuity that you're offered at the date of your retirement may be higher or lower than the figures quoted in your illustration. This is because the industry regulator, the Financial Conduct Authority (FCA), sets the annuity rates to use in projections. Where the term to retirement is within one year, Prudential's rates are used to convert the funds to pension income.
- We'll also send you an annual statement each year that will include an up-to-date illustration, to help you keep track of your benefits.

General information

- You can usually take the benefits from your pension plan from age 55 onwards (possibly earlier in certain circumstances, for example ill health). If you take them before the retirement date in this illustration though, you're likely to get back less than what's shown here.
- What actually happens in the future could be very different from the standard assumptions we've used, so you should consider getting further information or advice before you review these pension arrangements. You should discuss your retirement aims with your financial adviser if you have one. If you don't currently have an adviser, you can find an independent financial adviser in your area online at unbiased.co.uk
- You can also use Pension Wise, a free, impartial service offered by the government-backed MoneyHelper service. It offers guidance to people with personal pensions on all the options available for their pension savings. You can have a free consultation online, over the phone or face-to-face. To find out more or book a free appointment, call 0800 280 8880 or visit moneyhelper.org.uk/pensionwise. The Pension Wise website provides more information on shopping around at pensionwise.gov.uk/shop-around

Pension projection continued

- The actual amount of income at retirement depends on a number of factors, including
 - when the regular lifetime annuity payments commence
 - the actual contributions made
 - the actual performance of the investments that you've chosen
 - the actual charges and costs that apply
 - the rate of inflation, which reduces the real value (purchasing power) of the projected amounts and future contributions payable (for example, a pound will buy less in the future than it does today)
 - the cost of buying a lifetime annuity at the time retirement is taken
 - the tax rules that apply when the benefits are taken, and
 - your individual circumstances.
- When you take your pension benefits you'll have a number of options. This will include the option to use your pension fund to buy an income from another pension provider (known as the Open Market Option).
- The tax-free cash sum is usually limited to the lower of 25% of the fund, or any remaining lump sum allowance and lump sum and death benefit allowance.
- The lifetime annuity figures quoted are before the deduction of any Income Tax that may be due once you start taking your pension.

With-Profits information

Final Bonus

When money is removed from the With-Profits Fund we may add a Final Bonus. We calculate the Final Bonus based on the period the investment has been held continuously in the With-Profits Fund and the performance of the fund over that time. The Final Bonus amount can go up or down at any time and is not guaranteed.

The figures in this projection include an allowance for Final Bonus.

Market Value Reduction (MVR)

If the performance of the With-Profits Fund is lower than that reflected in the bonuses we've already added to your plan, we're likely to reduce the value of your pension benefits if you:

- decide to take your benefits before or after the date you reach your selected retirement age/date, as specified in your plan literature
- move the value of your plan to another pension plan
- switch out of the With-Profits Fund.

This reduction is called an MVR. An MVR is designed to be fair to planholders who leave the With-Profits Fund and those who remain invested.

Guarantees

We don't deduct MVRs under certain circumstances. We guarantee not to apply an MVR on death or if you decide to take your benefits at your selected retirement age/date as specified in your plan literature. This guarantee can be valuable, especially at times when stock markets are lower. In unfavourable investment conditions the guaranteed amount built up by adding regular bonuses may be more than the underlying investment value. Please refer to your Product Key Features and/or Policy documentation for full details of the guarantees applicable.

Pension projection continued

How we manage With-Profits investments

We've produced a detailed document called the 'Principles and Practices of Financial Management' (PPFM) which describes how we manage With-Profits investments. Our standard PPFM and product-specific, customer friendly PPFMs are available on our website at pru.co.uk/with-profits. If you'd rather have a written copy, please call us.

Our Directors' report shows how we've complied with these principles and practices. You can find this along with our most recent With-Profits Actuary's Report on our website. You'll also find a summary of notable changes we've made in the past or any notable changes we plan to make to the PPFM. If you'd like a written copy, give us a call.

Planholder
ANGELA STEAD

Plan number	50094231
Illustration date	4 June 2026
Planholder name	Mrs ANGELA STEAD
Selected Retirement Date (SRD)	16 October 2027

The value of your pension fund at 4 June 2026 is £33,718.07. This value includes a Final Bonus that's not guaranteed. Further information on With-Profits is provided below.

This provides an example of what your pension benefits may be worth should you

- take your retirement benefits at age 67

This assumes any change is made on 4 June 2026.

Pension projection continued

Illustration of your pension fund

What you might get back when you're 67

The following figures show what pension income you might get in today's prices to give you an idea of what your pension could be worth when you're 67. They've been adjusted to allow for inflation (the rising costs of goods and services) at an assumed rate of 2.00% each year. Actual inflation could be more or less than this. Inflation will reduce the buying power of what you might get back from your pension in the future and the value of all savings and investments.

Actual values might be lower or higher than those shown and your plan may pay back less than you've paid in. The projection is not a promise or guarantee and the figures are not minimum or maximum amounts.

The way we calculate the projection is set out by the regulator.

Assumed growth rates over the term of the plan (after allowing for the effects of inflation)	Low rate 0.00% a year	Mid rate 2.94% a year	High rate 5.88% a year
And interest rates when you retire are	2.90%	4.90%	6.90%
Your fund value could be	£32,700.00	£36,000.00	£39,400.00
This could give you:			
An estimated taxable yearly income for life with no tax-free cash of	£2,030.00	£2,700.00	£3,500.00
OR			
A tax-free cash payment of	£8,180.00	£9,000.00	£9,870.00
And an estimated smaller taxable yearly income for life of	£1,520.00	£2,020.00	£2,620.00

You can normally take up to 25% tax-free cash with most pension products. If you've any form of protection, this may mean you're entitled to more or less than this.

Assumptions and important notes

The figures in the projection assume you'll buy a lifetime annuity and that it'll be payable as follows:

- Single Life, monthly in advance for a minimum period of 5 years, and for your lifetime after that, with no increases.
- We've assumed a retirement date of 16 October 2029 at the age of 67.
- The projections shown have been based on the current fund holdings and associated charges and further costs, with no allowance for future switching.
- The Financial Conduct Authority (FCA) sets standard growth rates that companies can use in illustrations, but allow us to use other rates where appropriate. We've used growth rates that we feel give you the most realistic indication of potential future returns.

Pension projection continued

- Projections are calculated using a middle growth rate which we believe realistically reflects the investment potential of the product and the funds. We're also required by our regulator to provide additional projections using assumed growth rates 3% either side of this middle rate. In some circumstances, the yearly growth rates used have been limited, as required by our regulator, to 0% (lower rate), 3% (middle rate) and 6% (higher rate) after the effect of inflation. Where the growth rates we've used are higher than these rates it's because the fund(s) or some of the fund(s) you invest in provide specific guarantees in terms of minimum rates of return.
- The growth rates shown are an average based on all the funds you've chosen to invest in.
- Your investment in the With-Profits Fund offers a specific guarantee and this projection makes allowance for its effect. You should refer to your product literature or contact us for details of the specific guarantee that applies to this fund. General statements and warnings elsewhere within this illustration may still apply to the displayed values, due to other fund selections assumptions used in these calculations.
- The growth rates used in this illustration are reviewed on a regular basis. The timing of any reviews will mean the projections within this illustration may differ from those in any previous illustration you've received.
- For your pension to grow in real terms, your investments need to grow at a higher rate than the combined effect of inflation and charges (please note that charges may vary between different companies). In this illustration some of the projected values at retirement may be less than the total paid in. This is because the rate of investment growth we use to calculate those values is lower than the joint effect of charges and the rate we've assumed for inflation.
- Our charges, and the value of your pension, will depend on the funds you choose.
- Charges and costs may vary.
- The annuity that you're offered at the date of your retirement may be higher or lower than the figures quoted in your illustration. This is because the industry regulator, the Financial Conduct Authority (FCA), sets the annuity rates to use in projections. Where the term to retirement is within one year, Prudential's rates are used to convert the funds to pension income.
- We'll also send you an annual statement each year that will include an up-to-date illustration, to help you keep track of your benefits.

General information

- You can usually take the benefits from your pension plan from age 55 onwards (possibly earlier in certain circumstances, for example ill health). If you take them before the retirement date in this illustration though, you're likely to get back less than what's shown here.
- What actually happens in the future could be very different from the standard assumptions we've used, so you should consider getting further information or advice before you review these pension arrangements. You should discuss your retirement aims with your financial adviser if you have one. If you don't currently have an adviser, you can find an independent financial adviser in your area online at unbiased.co.uk
- You can also use Pension Wise, a free, impartial service offered by the government-backed MoneyHelper service. It offers guidance to people with personal pensions on all the options available for their pension savings. You can have a free consultation online, over the phone or face-to-face. To find out more or book a free appointment, call 0800 280 8880 or visit moneyhelper.org.uk/pensionwise. The Pension Wise website provides more information on shopping around at pensionwise.gov.uk/shop-around

Pension projection continued

- The actual amount of income at retirement depends on a number of factors, including
 - when the regular lifetime annuity payments commence
 - the actual contributions made
 - the actual performance of the investments that you've chosen
 - the actual charges and costs that apply
 - the rate of inflation, which reduces the real value (purchasing power) of the projected amounts and future contributions payable (for example, a pound will buy less in the future than it does today)
 - the cost of buying a lifetime annuity at the time retirement is taken
 - the tax rules that apply when the benefits are taken, and
 - your individual circumstances.
- When you take your pension benefits you'll have a number of options. This will include the option to use your pension fund to buy an income from another pension provider (known as the Open Market Option).
- The tax-free cash sum is usually limited to the lower of 25% of the fund, or any remaining lump sum allowance and lump sum and death benefit allowance.
- The lifetime annuity figures quoted are before the deduction of any Income Tax that may be due once you start taking your pension.

With-Profits information

Final Bonus

When money is removed from the With-Profits Fund we may add a Final Bonus. We calculate the Final Bonus based on the period the investment has been held continuously in the With-Profits Fund and the performance of the fund over that time. The Final Bonus amount can go up or down at any time and is not guaranteed.

The figures in this projection include an allowance for Final Bonus.

Market Value Reduction (MVR)

If the performance of the With-Profits Fund is lower than that reflected in the bonuses we've already added to your plan, we're likely to reduce the value of your pension benefits if you:

- decide to take your benefits before or after the date you reach your selected retirement age/date, as specified in your plan literature
- move the value of your plan to another pension plan
- switch out of the With-Profits Fund.

This reduction is called an MVR. An MVR is designed to be fair to planholders who leave the With-Profits Fund and those who remain invested.

Guarantees

We don't deduct MVRs under certain circumstances. We guarantee not to apply an MVR on death or if you decide to take your benefits at your selected retirement age/date as specified in your plan literature. This guarantee can be valuable, especially at times when stock markets are lower. In unfavourable investment conditions the guaranteed amount built up by adding regular bonuses may be more than the underlying investment value. Please refer to your Product Key Features and/or Policy documentation for full details of the guarantees applicable.

How we manage With-Profits investments

We've produced a detailed document called the 'Principles and Practices of Financial Management' (PPFM) which describes how we manage With-Profits investments. Our standard PPFM and product-specific, customer friendly PPFMs are available on our website at pru.co.uk/with-profits. If you'd rather have a written copy, please call us.

Our Directors' report shows how we've complied with these principles and practices. You can find this along with our most recent With-Profits Actuary's Report on our website. You'll also find a summary of notable changes we've made in the past or any notable changes we plan to make to the PPFM. If you'd like a written copy, give us a call.

Phone: 0345 640 2000

Or (+44) 178 644 8844 if phoning from abroad.

Lines open Monday to Friday, 8am to 6pm

Pension projection

Illustration of possible future benefits

Plan number

50094231

Planholder

ANGELA STEAD

Plan number	50094231
Illustration date	4 June 2026
Planholder name	Mrs ANGELA STEAD
Selected Retirement Date (SRD)	16 October 2027

The value of your pension fund at 4 June 2026 is £33,718.07. This value includes a Final Bonus that's not guaranteed. Further information on With-Profits is provided below.

This provides an example of what your pension benefits may be worth should you

- take your retirement benefits at age 74

This assumes any change is made on 4 June 2026.

ST156789-4 / QDPRU52 / VVNW / 001 / 000015 / 544445 / 000001 / 3 / 000001 / 8 of 14 / 2,3,4,5

Illustration of your pension fund

What you might get back on 1 October 2037

The following figures show what pension income you might get in today's prices to give you an idea of what your pension could be worth on 1 October 2037. They've been adjusted to allow for inflation (the rising costs of goods and services) at an assumed rate of 2.00% each year. Actual inflation could be more or less than this. Inflation will reduce the buying power of what you might get back from your pension in the future and the value of all savings and investments.

Actual values might be lower or higher than those shown and your plan may pay back less than you've paid in. The projection is not a promise or guarantee and the figures are not minimum or maximum amounts.

The way we calculate the projection is set out by the regulator.

Assumed growth rates over the term of the plan (after allowing for the effects of inflation)	Low rate 0.00% a year	Mid rate 2.94% a year	High rate 5.88% a year
And interest rates when you retire are	2.90%	4.90%	6.90%
Your fund value could be	£30,500.00	£42,200.00	£57,500.00
This could give you:			
An estimated taxable yearly income for life with no tax-free cash of	£2,470.00	£3,950.00	£6,140.00
OR			
A tax-free cash payment of	£7,640.00	£10,500.00	£14,300.00
And an estimated smaller taxable yearly income for life of	£1,850.00	£2,960.00	£4,600.00

You can normally take up to 25% tax-free cash with most pension products. If you've any form of protection, this may mean you're entitled to more or less than this.

Assumptions and important notes

The figures in the projection assume you'll buy a lifetime annuity and that it'll be payable as follows:

- Single Life, monthly in advance for a minimum period of 5 years, and for your lifetime after that, with no increases.
- We've assumed a retirement date of 1 October 2037 at the age of 74.
- The projections shown have been based on the current fund holdings and associated charges and further costs, with no allowance for future switching.
- The Financial Conduct Authority (FCA) sets standard growth rates that companies can use in illustrations, but allow us to use other rates where appropriate. We've used growth rates that we feel give you the most realistic indication of potential future returns.

Pension projection continued

- Projections are calculated using a middle growth rate which we believe realistically reflects the investment potential of the product and the funds. We're also required by our regulator to provide additional projections using assumed growth rates 3% either side of this middle rate. In some circumstances, the yearly growth rates used have been limited, as required by our regulator, to 0% (lower rate), 3% (middle rate) and 6% (higher rate) after the effect of inflation. Where the growth rates we've used are higher than these rates it's because the fund(s) or some of the fund(s) you invest in provide specific guarantees in terms of minimum rates of return.
- The growth rates shown are an average based on all the funds you've chosen to invest in.
- Your investment in the With-Profits Fund offers a specific guarantee and this projection makes allowance for its effect. You should refer to your product literature or contact us for details of the specific guarantee that applies to this fund. General statements and warnings elsewhere within this illustration may still apply to the displayed values, due to other fund selections assumptions used in these calculations.
- The growth rates used in this illustration are reviewed on a regular basis. The timing of any reviews will mean the projections within this illustration may differ from those in any previous illustration you've received.
- For your pension to grow in real terms, your investments need to grow at a higher rate than the combined effect of inflation and charges (please note that charges may vary between different companies). In this illustration some of the projected values at retirement may be less than the total paid in. This is because the rate of investment growth we use to calculate those values is lower than the joint effect of charges and the rate we've assumed for inflation.
- Our charges, and the value of your pension, will depend on the funds you choose.
- Charges and costs may vary.
- The annuity that you're offered at the date of your retirement may be higher or lower than the figures quoted in your illustration. This is because the industry regulator, the Financial Conduct Authority (FCA), sets the annuity rates to use in projections. Where the term to retirement is within one year, Prudential's rates are used to convert the funds to pension income.
- We'll also send you an annual statement each year that will include an up-to-date illustration, to help you keep track of your benefits.

General information

- You can usually take the benefits from your pension plan from age 55 onwards (possibly earlier in certain circumstances, for example ill health). If you take them before the retirement date in this illustration though, you're likely to get back less than what's shown here.
- What actually happens in the future could be very different from the standard assumptions we've used, so you should consider getting further information or advice before you review these pension arrangements. You should discuss your retirement aims with your financial adviser if you have one. If you don't currently have an adviser, you can find an independent financial adviser in your area online at unbiased.co.uk
- You can also use Pension Wise, a free, impartial service offered by the government-backed MoneyHelper service. It offers guidance to people with personal pensions on all the options available for their pension savings. You can have a free consultation online, over the phone or face-to-face. To find out more or book a free appointment, call 0800 280 8880 or visit moneyhelper.org.uk/pensionwise. The Pension Wise website provides more information on shopping around at pensionwise.gov.uk/shop-around

Pension projection continued

- The actual amount of income at retirement depends on a number of factors, including
 - when the regular lifetime annuity payments commence
 - the actual contributions made
 - the actual performance of the investments that you've chosen
 - the actual charges and costs that apply
 - the rate of inflation, which reduces the real value (purchasing power) of the projected amounts and future contributions payable (for example, a pound will buy less in the future than it does today)
 - the cost of buying a lifetime annuity at the time retirement is taken
 - the tax rules that apply when the benefits are taken, and
 - your individual circumstances.
- When you take your pension benefits you'll have a number of options. This will include the option to use your pension fund to buy an income from another pension provider (known as the Open Market Option).
- The tax-free cash sum is usually limited to the lower of 25% of the fund, or any remaining lump sum allowance and lump sum and death benefit allowance.
- The lifetime annuity figures quoted are before the deduction of any Income Tax that may be due once you start taking your pension.

With-Profits information

Final Bonus

When money is removed from the With-Profits Fund we may add a Final Bonus. We calculate the Final Bonus based on the period the investment has been held continuously in the With-Profits Fund and the performance of the fund over that time. The Final Bonus amount can go up or down at any time and is not guaranteed.

The figures in this projection include an allowance for Final Bonus.

Market Value Reduction (MVR)

If the performance of the With-Profits Fund is lower than that reflected in the bonuses we've already added to your plan, we're likely to reduce the value of your pension benefits if you:

- decide to take your benefits before or after the date you reach your selected retirement age/date, as specified in your plan literature
- move the value of your plan to another pension plan
- switch out of the With-Profits Fund.

This reduction is called an MVR. An MVR is designed to be fair to planholders who leave the With-Profits Fund and those who remain invested.

Guarantees

We don't deduct MVRs under certain circumstances. We guarantee not to apply an MVR on death or if you decide to take your benefits at your selected retirement age/date as specified in your plan literature. This guarantee can be valuable, especially at times when stock markets are lower. In unfavourable investment conditions the guaranteed amount built up by adding regular bonuses may be more than the underlying investment value. Please refer to your Product Key Features and/or Policy documentation for full details of the guarantees applicable.

Planholder

ANGELA STEAD

Prudential Personal Pension Scheme

Planholder details

Name of planholder	Mrs ANGELA STEAD
Current age of planholder	63

Plan summary

Plan number	50094231
Type of plan	Prudential Personal Pension Scheme
Plan start date	1 September 1988
Selected Retirement Date	16 October 2027 (age 65)

Current values

Total fund value of the plan on 4 June 2026	£11,211.92
Total transfer value of the plan on 4 June 2026	£33,718.07
It includes:	
Final Bonus amount	£22,506.15

The values shown are not guaranteed and can go down or up depending on investment performance.

Fund value

The total fund value shown above is the current value of the member's plan before any Final Bonus or deductions are included. It will include all Regular Bonuses applied to date. It's equal to the value of the benefits held in the member's chosen investment fund(s).

If the planholder takes money out of the With-Profits Fund, we may make an adjustment to the fund value if the value of the underlying assets is less than the value of the plan, including all bonuses. This adjustment is known as a Market Value Reduction (MVR).

An MVR is designed to protect investors who aren't taking their money out. It's application means that the planholder gets a return based on the earnings of the With-Profits Fund over the period that payments have been invested.

We apply the MVR to the plan value, including Regular and Final bonuses. We don't apply an MVR at the retirement date or on any claims as a result of death.

"Prudential" is a trading name of The Prudential Assurance Company Limited which is registered in England and Wales. Registered office at 10 Fenchurch Avenue, London, EC3M 5AG. Registered number 15454. Authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority.

Plan details continued

Investment summary

All of the fund holdings shown in the following table(s) are correct as at 4 June 2026.

Fund	Number of units	Unit price	Fund value	Annual Management Charge (AMC) %
With-Profits Fund	N/A	N/A	£11,211.92	N/A
Total Value			£11,211.92	

For With-Profits Funds, any current Final Bonus is excluded from the fund value. It'll include all Regular Bonuses applied to date.

Regular contributions

This plan is not currently receiving any regular contributions.

Other contributions

Total of former Protected Rights contributions	£3,377.17
--	-----------

Payments to your adviser

There are no Adviser Charges applied to the planholder's plan.

Charges

Annual Management Charge (AMC)

This is the charge we take for looking after the planholder's investment. These charges will be taken into account when we work out the value of the plan.

For Unitised and Cash Accumulation With-Profits Funds, we take an AMC to cover the various costs involved in setting up and managing the plan. The charge is already taken into account when we calculate bonus rates.

Transaction costs

Transaction costs occur when a fund buys or sells investments. They're already accounted for in the investment returns of the fund, meaning they aren't separate charges. Due to the movement of prices, transaction costs can be positive or negative.

- A positive transaction cost will reduce potential investment returns.
- A negative transaction cost will increase potential investment return.

If you're invested in a PruFund and/or a With-Profits fund, there are further costs which are not charged directly to your investment. These are factored into the setting of the PruFund expected growth rates and With-Profits bonus rates. They are also reflected in the values shown in this document.

Plan details continued

Death benefits

Estimated value payable on death	£33,718.07
----------------------------------	------------

The estimated value shown is not guaranteed and was calculated hypothetically based on a death claim being paid using the prices and benefits as at 4 June 2026.

- We'll pay the plan value at the date of the planholder's death along with any Final Bonus (which isn't guaranteed), as a lump sum.

Trust information

Is the plan subject to a trust?	No
Beneficiary	No

Waiver

A Waiver of Premium benefit is not applicable to this pension plan.

Pension input period

This is a period of time that is used to calculate how much has been contributed to a pension in a tax year to determine whether there's a breach of HMRC's Annual Allowance.

Pension input periods run in line with the tax year. The current pension input period runs from 6 April to 5 April each year. If you require any further information, please contact us.

S156789-4 / ODPFUS2 / VVNW / 001 / 000023 / 544445 / 000001 / 3 / 000001 / 12 of 14 / 2,3,4,5

Plan details continued

Additional information

- Reinvestment of charges is not applicable to this plan.
- This plan is a Defined Contribution Money Purchase Plan.
- Please note that MEX/SEDOL/ISIN codes only apply when the plan is invested in unit-linked funds. At the moment, this plan is invested in the With-Profits Fund.
- Further details of the With-Profits Fund, bonuses and asset mix are available online at pru.co.uk/funds
- There are no specific charges for making this plan paid up.
- It's not possible to transfer the plan and continue making contributions.
- It's possible to extend the Selected Retirement Date by five years, or to age 75: whichever of the two is earlier.
- The planholder can take their retirement benefits from age 55. Under the terms of the contract though, benefits must be taken by age 75.
- We can accept pension-to-pension transfers from other arrangements, e.g. Section 32 contracts, personal and occupational pension schemes. We don't accept transfers for immediate vesting.
- There's no life cover present on this plan.
- This plan can't be assigned.
- No surrender value is available under this plan.
- If a transfer is required and the receiving scheme is registered on Origo Transfer Service, it can be used to transfer the benefits from this plan. Any transfer value quote requested is being sent under separate cover.
- Income drawdown isn't directly available from this plan. However it may be transferred to an income drawdown product with us or another provider.
- Large fund discounts and rebates aren't applicable to this plan.

Important notes

The pension scheme is registered in accordance with Section 153 of the Finance Act 2004, or deemed registered in accordance with paragraph 1 of Schedule 36 of the Finance Act 2004.

Plan ownership

This plan is owned by the planholder.

At retirement

At retirement normally up to 25% of the fund value can be taken as a tax-free cash sum with the remainder being used to provide retirement income or taxable cash sum(s). Please refer to the scheme rules for further details.

Guaranteed Annuity Rate (GAR)

This plan does not have any guaranteed annuity rates.

Guaranteed Minimum Pension (GMP)

This plan doesn't have any GMP.

Plan details continued

Fund switches

There are currently no charges for fund switches. However we reserve the right to charge for fund switches in the future.

If the planholder switches money out of the With-Profits Fund, we might take a Market Value Reduction (MVR). If we do, the value of the plan will reduce.

The planholder is able to invest in up to 20 funds at any one time.

With-Profits Fund

We invest in a broad mix of investment types. We invest in property, UK and international stocks and shares, cash, and corporate and government bonds.

Bonuses are how the planholder gets their share of the profits

There are two types:

Regular Bonus – we usually add this daily, monthly or yearly (depending on the type of plan). We might not add a Regular Bonus each year. But if we do add it to the plan, the guaranteed minimum payout will be higher.

Final Bonus – we might add a Final Bonus when the planholder takes their money out, but it's not guaranteed. How much we might add could go down as well as up. We may reduce any Final Bonus rates (or not pay it at all) without giving any notice.

The With-Profits Fund aims to smooth some of the extreme highs and lows of short-term investment performance in order to provide a more stable return. We do this by holding back some of the investment returns in good years with the aim of using this to support bonus rates in the years where the investment returns are lower.

Smoothing offers some protection against bad market conditions. However, bear in mind that smoothing will not stop the value of the plan reducing if investment returns have been low.

Market Value Reduction (MVR)

When money is moved out of the With-Profits Fund, we might reduce the fund value. We would do this if the value of the underlying assets is worth less than the value of the plan (including all bonuses). We call this a Market Value Reduction (MVR). The full plan value (including any Regular and Final bonuses) will be used when working out any MVR.

An MVR might mean the planholder receives less when they take money out of their plan. They might even get back less than they invested.

Guarantee charge on the With-Profits Fund

This is a charge the planholder pays for the guarantees supported by the With-Profits Fund. We guarantee not to take an MVR on any money we pay out on death or at the Selected Retirement Date.

At the moment, the total amount for the guarantee charge, over the time they've been invested in the With-Profits Fund, will be no more than 2% of any money paid out from it. Our charges might change and could be higher in the future. This could happen if (for example) the type of investments in the With-Profits Fund changed.

We allow for these guarantee charges by making adjustments to bonuses.

Finding out more about how we manage our With-Profit business

We manage our With-Profits business according to our Principles and Practices of Financial Management (PPFM).

- A brief summary of the PPFM is given in our With-Profits Summary: How we manage our With-Profits Funds.
- Our Directors' report shows how we've complied with these principles and practices. You can find this along with our most recent With-Profits Actuary's Report.
- You'll also find a summary of notable changes we've made in the past and any notable changes we plan to make to the PPFM.

Please read the important notes at the end of this statement.

If you need more information or have any questions, please contact us and we'll be happy to help.

Member summary

Member	Mrs ANGELA STEAD
Current member age	63
Date of valuation	4 June 2026

The value of the plan(s) on 4 June 2026

Plan number: 50094231

Date plan started: 1 September 1988

Type of plan: Prudential Personal Pension Scheme

Fund	Number of units	Bid price (p)	Fund value (£)
With-Profits Fund	N/A	N/A	£11,211.92
Total value			£11,211.92

Important notes

The current value of the plan

For With-Profits Funds, any current Final Bonus is excluded from the fund value. It will however include all Regular Bonuses applied to-date. The current amount of Final Bonus is £22,506.15, but this may vary and is not guaranteed.

We've assumed that all expected contributions have been paid. If they've not been, the value may be less than what's shown in this valuation.

Recent payments

We've assumed that any recent payments have been cleared by the bank. If they've not been, the value of the plan may be less than shown in this valuation.

With-Profits information

We invest in a broad mix of investment types, such as property, UK and international stocks and shares, cash, and corporate and government bonds.

Bonuses are how you get your share of the profits

There are two types of bonus:

Regular Bonus – We usually add this daily, monthly or yearly (depending on the type of plan they have). We might not add a Regular Bonus each year. But if we do add it to their plan, the guaranteed minimum payout will be higher.

"Prudential" is a trading name of The Prudential Assurance Company Limited which is registered in England and Wales. Registered office at 10 Fenchurch Avenue, London, EC3M 5AG. Registered number 15454. Authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority.

Plan valuation continued

Final Bonus – We might add a Final Bonus when they take their money out, but it's not guaranteed. How much we may add could go down as well as up. We may reduce any Final Bonus rates (or not pay it at all) without giving them any notice.

The With-Profits Fund aims to smooth some of the extreme highs and lows of short-term investment performance in order to provide a more stable return. We do this by holding back some of the investment returns in good years, with the aim of using this to support bonus rates in the years where the investment returns are lower.

Smoothing offers some protection against bad market conditions. However, bear in mind that smoothing will not stop the value of their plan reducing if investment returns have been low.

Guarantee charge on the With-Profits Fund

This is a charge the planholder pay for the guarantees supported by the With-Profits Fund. We guarantee not to take a Market Value Reduction (MVR) on any money we pay out on death or at the selected retirement date. Right now, there are other circumstances when we wouldn't take an MVR - but these aren't guaranteed and could change.

At the moment, the total amount for the guarantee charge, over the time they have been invested in the With-Profits Fund, will be no more than 2% of any money paid out from it. Our charges might change and could be higher in the future. This could happen if (for example) the type of investments in the With-Profits Fund changed.

We allow for these guarantee charges by making adjustments to their bonuses.

Market Value Reduction (MVR)

A Market Value Reduction (MVR) is an amount we might deduct when money is withdrawn from the With-Profits Fund. We would do this if the value of the underlying assets of the fund is less than the value of their plan including bonuses. We may deduct a Market Value Reduction (MVR) if they:

- decide to retire before or after the date they reach their selected retirement age/date, as specified in their plan literature
- move the value of their plan to another pension plan and/or
- switch out of the With-Profits Fund.

An MVR is designed to balance the interests of continuing investors with those who want to cash-in their plan.

Further information

We manage our With-Profits business according to our Principles and Practices of Financial Management (PPFM). A brief summary of the PPFM is given in our With-Profits summary: 'How we manage our With-Profits funds.' Our Directors' report shows how we've complied with these principles and practices. You can find this along with our most recent With-Profits Actuary's Report. You'll also find a summary of notable changes we've made in the past and any notable changes we plan to make to the PPFM. These documents are all available at pru.co.uk/with-profits or by contacting us.

Market Value Reduction

A clear explanation

What's a Market Value Reduction?

If you withdraw or switch money from a with-profits fund, you may get less than the value of your plan as shown on the last policy statement we sent you. This is so that we can make sure everyone invested in a with-profits fund gets a fair share of the profits. We call this a Market Value Reduction (MVR), as what we'll pay out is based on the underlying market value of the investments.

How a with-profits fund works

Instead of paying you direct returns (such as dividends), a with-profits fund typically pays you a share of its profits via bonuses that are added to the value of your plan.

In deciding how much a bonus should be, we use a process called 'smoothing'. This means when the value of investments goes up, we may hold back some of the money we would otherwise pay to investors in their bonuses. As a result, when the value of investments goes down, it's more likely we will still be able to pay bonuses. This 'smoothes' the impact on your returns of sharp rises and falls in the market.

Why we sometimes apply an MVR to a with-profits fund

The prices of assets traded on financial markets usually move up or down a bit every day. But sometimes, there can be a very sharp fall in the markets – such as during the COVID-19 Pandemic.

If lots of investors pull their money out of a with-profits fund after a sharp fall in its value, there's a risk they could get an unfairly large share of the fund's profits. This would leave remaining investors worse off. So, an MVR protects investors who aren't taking their money out, and means that you get a return based on the earnings of the with-profits fund over the period your payments have been invested.

So, if you tell us you want to make a withdrawal or a transfer from a with-profits fund, we might decide to apply an MVR to your transaction. This means you'll get less than the value of your plan, as shown in your last statement.

An MVR means we can be fair to all investors

The money the MVR holds back from your withdrawal or transfer doesn't go to us. Instead, it's kept in the fund, where it's used to protect those who remain invested. An MVR aims to balance returns for investors who stay in the fund with those who leave.

For example:

Imagine that five investors all have equal, £10,000 stakes in a single fund worth £50,000.

The value of the fund falls by 20%, and it is now worth £40,000. One investor, Angela, decides to leave, but her stake isn't adjusted to allow for the recent fall in value. She gets £10,000.

The remaining £30,000 is divided between the four investors who stay in the fund – so they're down to £7,500 each.

An MVR applied to Angela's withdrawal, resulting in Angela being paid £8,000 might have felt unfair to her. But it would have been the fairest thing to everyone with a stake in the fund.

When an MVR will apply to your transaction

We apply MVRs on a case-by-case basis. We may decide to apply an MVR if:

- the value of your plan is greater than the value of the assets your money is invested in

and you do one of the following:

- switch into another investment fund (including between with-profits funds)
- cash in or transfer your plan
- take early or late retirement
- take a full or partial withdrawal from your plan (if allowed)
- pay adviser charges from a with-profits fund
- take certain regular withdrawals.

We may change our MVR practice at any time without giving prior notice. For example, it may be altered if there's a significant reduction in the value of the investment markets in which our with-profits funds invest, or if there's a significant increase in the number of people wanting to cash-in their with-profits investments.

If we make a change to our current practice, it would apply to all new plans and existing plans in place at the time of the change.

How an MVR will affect the value of your transaction

An MVR isn't a fixed amount. The reduction will depend on:

- how much your plan is worth, including any bonuses that have been applied to it
- the performance of the with-profits fund over the time you've been invested in it.

When an MVR will not apply to your transaction

You'll only be affected by an MVR if you want to withdraw or transfer your money. Otherwise, it won't affect you. We also guarantee not to apply an MVR:

- if the investor has died
- at the selected/normal retirement date of a pension plan
- at the anticipated annuitisation age of a relevant income drawdown plan
- at the maturity of an endowment plan.

If you want to know more

You can find more information on MVRs in your product Key Features and policy documentation.

You can also refer to our 'Customer-Friendly Principles and Practices of Financial Management' documents in the 'Unitised and Cash Accumulation With-Profits' section, which can be found at pru.co.uk/ppfm

You can call us on 0800 000 000 Monday to Friday 8am to 6pm. We might record your call for training and quality purposes.

About this form

- alter specific fund choices, or

- select a Lifestyle option.

Prudential Personal Pension Plan number

Title Mr Mrs Miss Ms Dr Other

Full Forenames

Surname

National Insurance number

--	--	--	--	--	--	--	--	--

If you redirect all your contributions into With-Profits Funds you will be unable to redirect future contributions back into any of our Unit Linked Funds.

Complete this section to specify exact requirements on the:

- percentage(s) of existing investments to be cancelled
- percentage(s) of cash realised to be applied to the revised fund selection
- redirection of future regular contributions
- Selected Retirement Date for reallocated investments and future contributions

[illegible]

Date	0	1					
------	---	---	--	--	--	--	--

(This will apply to reallocated investments and future regular contributions. Any investments remaining in With-Profits funds will retain their current Selected Retirement Date.)

Part 4 – Lifestyle options

Your Fund Guide is available at pru.co.uk/pdf/INVB6572.pdf or on request.

Details of the lifestyle options are contained in your Fund Guide. Lifestyle options do not apply to With-Profits funds.

Please tick one option only. Your selection will apply to the whole of your plan.

Lifetime Investment Profile targeting **retirement options**

☐

Lifetime Investment Profile targeting **an annuity**

☐

Lifetime Investment Profile targeting **100% cash**

☐

Lifetime Investment Profile targeting **drawdown**

☐

Notes

- Once an investment switch has been processed it cannot be cancelled.
- Details of all funds currently available are contained in the fund guide available on pru.co.uk or on request.
- We will sell and buy relevant units on the Unit Price Date(s) applicable following receipt of all the information we require.
- If all, or any part of your Plan is invested in the With-Profits Fund, and the pension is transferred, switched to another fund or early retirement is taken, we may apply an adjustment called a Market Value Reduction (MVR). If an MVR applies you may not receive any final bonus, or the full value of the regular bonus and you may even get back less than you had invested. However, the amount you get back from your Plan will not be less than the current market value of the assets underlying your Plan. MVRs are designed to protect investors not taking their money out of the fund. Full details of our current practice of applying an MVR can be found in the Key Features document and MVR – a clear explanation document reference PRUS6165.
- Re-allocation of existing investments (or redirection of future contributions) to the With-Profits Fund is not allowed if you are within five years of the selected retirement date. Switches from the Deposit Fund to the With-Profits Cash Accumulation Fund are not allowed at any time.
- If you only pay regular contributions into With-Profits you are unable to redirect future contributions into any of our Unit Linked Funds.
- It is not currently our practice to make a charge for any fund switches (including lifestyle options), however, subject to adequate notice being given, we reserve the right to do so at any time.

How we use your personal information

For a copy of our latest Data Protection Notice, please visit pru.co.uk/mydata-cp. This details how and why we use your personal information (including any sensitive personal information), who we may share it with and your rights around your personal information. Alternatively, you can request a hard copy to be sent to you by writing to The Data Protection Officer, Customer Service Centre, Lancing, BN15 8GB. Please note that we collect personal information from you that is necessary for us to either provide you with the product or service you've requested or to comply with statutory or contractual requirements. Unfortunately if you don't provide all of the information we require this may mean we are unable to provide our products and services to you.

Declaration

I have read the Notes above, and request either the revised fund selections stated, or the lifestyle option selected, in this form.
