

Non-UCITS Retail Scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Vanguard LifeStrategy 60% Equity Fund (the "Fund")

A sub-fund of Vanguard LifeStrategy Funds ICVC

A GBP Accumulation Shares

ISIN: GB00B3TYHH97

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to provide a return on your investment (through an increase in the value of, and income received from, assets held by the Fund) within a pre-defined asset allocation over the long-term (5 years or more).
- The Fund is actively managed and seeks to achieve its investment objective by investing at least 90% of its assets by value in a diversified portfolio of passive funds that seek to track the performance of an index, and which are managed or operated by the ACD or other companies in the Vanguard Group of Companies ("Associated Schemes").
- The pre-defined asset allocation for the Fund means that it is intended that the Fund will invest: (1) approximately 60% of its assets by value in Associated Schemes which provide exposure to shares of companies worldwide. Approximately 20% of such investments (by value) will be in UK listed companies; and (2) approximately 40% of its assets by value in Associated Schemes which provide exposure to government and corporate bonds and other similar fixed income investments worldwide. Approximately 20% of such investments (by value) will be in Sterling-denominated investments (including UK government bonds (gilts), government related bonds, index-linked gilts and investment-grade bonds), which may include Sterling-denominated bonds issued by companies outside the UK.
- This Fund is part of a range of funds. Within this range, a fund which invests more in Associated Schemes that provide exposure to shares of companies will typically be riskier than a fund which invests more in Associated Schemes that provide exposure to government and corporate bonds and other similar fixed income investments.
- The Fund may also invest up to 10% of its assets directly in transferable securities (such as shares, bonds and other similar fixed income investments, which will generally be components of the indices tracked by the Associated Schemes), money market instruments and deposits.
- In addition to the pre-defined asset allocation, the Investment Adviser will aim to maintain a strategic asset allocation that is designed using research

conducted by Vanguard. The Fund does not aim to outperform this strategic asset allocation.

- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management"). A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The currency of the share class is GBP.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 5 years.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus). A list of the days on which shares in the Fund cannot be bought or sold is available on: <https://fund-docs.vanguard.com/Vanguard-LifeStrategy-Funds-ICVC.pdf>

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and bonds can be affected by factors such as stock market movements, interest rates, credit spreads and volatility. Other driving factors include political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfers of assets and failed/delayed delivery of securities or payments to the Fund.

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

For further information on risks please see the "Risk Factors and Performance" section of the Prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.20%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures and in some cases you might pay less. Investors can find out the actual entry and exit charges from their distributor and or adviser.

The ongoing charges figure is based on expenses for the year ended 31 December 2025. This figure may vary from year to year. It excludes portfolio transaction costs.

For further information about charges please see the sections entitled “Buying Shares”, “Redeeming Shares”, “Charges and Expenses”, “Dilution Adjustment” and Appendix 1 of the Prospectus on our website at <https://global.vanguard.com>

CT UNIVERSAL MAP BALANCED FUND (THE "FUND")

Class C Accumulation Shares (GBP) GB00BF99W060, a sub-fund of Columbia Threadneedle (UK) ICVC III (the "Company"), regulated by the FCA.

This sub-fund is managed by Columbia Threadneedle Fund Management Limited, (part of the Columbia Threadneedle Investments group of companies).

Objectives and Investment Policy

- The Fund seeks to provide growth, combining capital and income, over the long term (at least 5 years) consistent with a balanced volatility level over the long term.
- The Fund will gain exposure to a range of global asset classes.
- At any point the Fund may be invested in any one or more of the following: collective investment schemes, equities (ordinary shares in companies), fixed income securities (securities that pay either a fixed or variable level of income on a periodic basis and generally repay a specified amount at a pre-determined date) including both government and non-government bonds, derivatives (an investment contract between the Fund and a counterparty the value of which is derived from one or more underlying assets), money-market instruments, deposits, cash and near cash, real estate investment trusts and other transferable securities. The Fund may use derivatives for investment purposes as well as for efficient portfolio management.
- The Fund is actively managed and the investment manager is not constrained by any particular asset allocation in respect of geography, industry or sector. The collective investment schemes in which the Fund invests may include other schemes promoted by Columbia Threadneedle Investments. Typically, the Fund will maintain, in normal market conditions, an exposure to equities of between 30% - 70% of the value of the portfolio, which in the investment manager's view, is consistent with the Fund's aim to maintain a balanced volatility level.
- The investment manager will aim to manage the Fund within a long term (at least 5 Years) volatility range.
- As the Fund is actively managed, the investment manager will determine the asset allocation exposures and ranges which are consistent with the target volatility range. At the investment manager's discretion, particularly in times of market stress, the Fund may not remain within the target volatility range over shorter time periods.
- Income from investments in the Fund will be added to the value of your shares.
- You may buy or sell shares daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point. We are not required to hold monies arising from the purchase and sales of shares in our funds in a client money bank account and hold these monies in our own bank account, utilising the FCA's permitted one-day window while carrying out a delivery versus payment transaction for the purpose of settling transactions in relation to units in the Fund. In the exceptional event that a transaction is not processed within this one-day window, any cash will be held in a client bank account. No interest will be paid to investors on cash held on a client bank account.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk,
Typically lower rewards

Higher Risk,
Typically higher rewards

- The Fund is rated 4 because historically it has shown a medium level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The indicator may not adequately reflect the following risks of investing in particular assets, which may impact on future investment return:
 - Derivative Risk: derivative values rise and fall at a greater rate than equities and debt instruments. Losses can be greater than the initial investment.
 - Fixed Interest Securities Risk: changes in interest rates can affect the values of fixed interest holdings.
 - Credit Risk: receiving income or capital due from debt instruments is dependent on the provider's ability to pay.
 - Smaller Companies Risk: smaller companies carry a higher degree of risk and their value can be more sensitive to market movement.
 - Emerging Markets Risk: this Fund invests in emerging markets which are less developed and have additional legal and political risks.
 - Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.
 - Currency Risk: your investment may be adversely affected by changes in currency exchange rates.
 - Leverage Risk: the use of derivatives to increase the exposure of the Fund to the market through either long or short positions will make the value of the Fund's investments more volatile than those of an unleveraged fund.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge:	0.00%
Exit Charge:	0.00%

These are the maximum charges that we might take out of your money before it is invested. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing Charges:	0.29%
------------------	-------

Charges taken from the fund under certain specific conditions

Performance Fee:	NONE
------------------	------

The ongoing charges figure shown here is an estimate of the charges because recent changes made to the Fund mean that the historic figures do not accurately reflect its ongoing costs. The UK-UCITS' annual report for each financial year will include detail on the exact charges made.

For more information about charges please see the Fund's prospectus.

Past Performance

Past performance is not a guide to future performance.

Fund launch date: 10/11/2017

Share/unit class launch date: 10/11/2017

Performance is calculated in GBP.

All charges and fees, except any entry, exit and switching charge, have been included within the performance.

This chart shows how much the Fund increased or decreased in value as a percentage each year.
